SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, DC 20549**

FORM 10-Q

x QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended July 1, 2012

Commission file number 1-7349

BALL CORPORATION

State of Indiana

35-0160610

10 Longs Peak Drive, P.O. Box 5000
Broomfield, CO 80021-2510
303/469-3131

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes x No o

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes x No o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer x

Accelerated filer o

Non-accelerated filer o

Smaller reporting company o

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes o No x

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Outstanding at July 1, 2012
Common Stock, without par value	154,730,679 shares

Ball Corporation Notes to Unaudited Condensed Consolidated Financial Statements

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements include the accounts of Ball Corporation and its controlled affiliates, including its consolidated variable interest entities (collectively Ball, the company, we or our), and have been prepared by the company. Certain information and footnote disclosures, including critical and significant accounting policies normally included in financial statements prepared in accordance with generally accepted accounting principles, have been condensed or omitted for this presentation.

Results of operations for the periods shown are not necessarily indicative of results for the year, particularly in view of the seasonality in the packaging segments and the irregularity of contract revenues in the aerospace and technologies segment. These unaudited condensed consolidated financial statements and accompanying notes should be read in conjunction with the consolidated financial statements and the notes thereto included in the company's Annual Report on Form 10-K filed on February 22, 2012, pursuant to Section 13 of the Securities Exchange Act of 1934 for the fiscal year ended December 31, 2011 (annual report).

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting periods. These estimates are based on historical experience and various assumptions believed to be reasonable under the circumstances. Actual results could differ from these estimates under different assumptions and conditions. However, we believe that the financial statements reflect all adjustments which are of a normal and recurring nature and are necessary to fairly state the results of the interim periods.

The company utilized a third party appraiser to assist in the evaluation of the estimated useful lives of its drawn and ironed can and related end production equipment used to make beverage cans and ends and two-piece food cans. This evaluation was performed as a result of the global alignment of the company's use and maintenance practices for this equipment and the company's experience with the duration over which this equipment can be utilized. As a result, the company has revised the estimated useful lives of this type of equipment utilized throughout the company, which resulted in a net reduction in depreciation expense and cost of sales of \$8.9 million (\$5.6 million after tax, or \$0.04 per diluted share) and \$17.8 million (\$11.2 million after tax, or \$0.07 per diluted share) in the second quarter and first six months of 2012, respectively, and is expected to result in a net decrease in 2012 full year depreciation expense and cost of sales of approximately \$34.9 million (\$22.3 million after tax, or \$0.14 per diluted share) as compared to the amount of depreciation expense and cost of sales that would have been recognized by utilizing the prior depreciable lives. The company has also evaluated its estimates of the accounting for tooling, spare parts and dunnage, as well as the related obsolescence, and aligned its practices for all operations, resulting in a one-time increase in cost of sales and depreciation expense of \$2.9 million (\$1.7 million after tax, or \$0.01 per diluted share) and \$5.2 million (\$3.0 million after tax, or \$0.02 per diluted share) in the second quarter and first six months of 2012, respectively, and is expected to result in an increase in cost of sales and depreciation expense of \$11.0 million (\$6.7 million after tax, or \$0.04 per diluted share) for the full year, primarily attributable to the immediate recognition of expense as items are placed in service.

Effective January 1, 2012, the company changed the presentation of capitalized software in its unaudited condensed consolidated financial statements to classify such assets as intangible assets rather than property, plant and equipment. As a result, the amounts included in the balance sheet in intangible assets were \$48.0 million and \$45.2 million as of July 1, 2012, and December 31, 2011, respectively. Capitalized software amounts that were previously reported as depreciation have been reclassified to amortization for all periods presented in the statements of earnings and cash flows, as well as in the notes to the unaudited condensed consolidated financial statements.

Certain prior period amounts have been reclassified in order to conform to the current period presentation.

Ball Corporation
Notes to Unaudited Condensed Consolidated Financial Statements

2. Accounting Pronouncements

Recently Adopted Accounting Standards

In September 2011, accounting guidance was issued to allow companies to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value as a basis for determining whether it is necessary to perform the two-step quantitative goodwill impairment test described in current accounting guidelines. The guidance was effective for Ball on January 1, 2012. Ball will be impacted by this new guidance during the fourth quarter of 2012 as the company performs the annual goodwill impairment test. The company does not expect the adoption to have a material effect on the unaudited condensed consolidated financial statements.

In June 2011, accounting guidance was issued requiring that all nonowner changes in stockholders' equity be presented either in a single continuous statement of comprehensive earnings or in two separate but consecutive statements. The guidance also requires the company present on the face of the financial statements reclassification adjustments for items that are reclassified from other comprehensive earnings to net earnings, which has been delayed. Ball has historically presented comprehensive earnings within the statement of changes in shareholders' equity and has adopted the two separate but consecutive statements presentation in its consolidated financial statements effective January 1, 2012. The new guidance did not have a material effect on the company's unaudited condensed consolidated financial statements.

In May 2011, amendments to existing accounting guidance were issued that result in a more consistent definition of fair value and common requirements for measurement of, and disclosure about, fair value between United States (U.S.) GAAP and International Financial Reporting Standards (IFRS). The amendments in the new guidance provide explanations on how to measure fair value but do not require additional fair value measurements. The new fair value guidance was effective for Ball as of January 1, 2012, and did not have a material effect on the company's unaudited condensed consolidated financial statements or disclosures.

New Accounting Guidance

In December 2011, accounting guidance was issued requiring disclosures to help reconcile differences in the offsetting requirements under U.S. GAAP and IFRS. The new disclosure requirements mandate that companies disclose both gross and net information about instruments and transactions eligible for offset in the statement of financial position as well as instruments and transactions subject to an agreement similar to a master netting arrangement. The guidance is effective for Ball on January 1, 2013, and is not expected to have a material effect on the company's unaudited condensed consolidated financial statements.

3. Business Segment Information

Ball's operations are organized and reviewed by management along its product lines and presented in the following four reportable segments.

Metal beverage packaging, Americas and Asia: Consists of the metal beverage packaging, Americas, operations in the U.S., Canada and Brazil, and the metal beverage packaging, Asia, operations in the People's Republic of China (PRC). The Americas and Asia segments have been aggregated based on similar economic and qualitative characteristics. The operations in this reporting segment manufacture and sell metal beverage containers, and also manufacture and sell non-beverage plastic containers in the PRC.

Metal beverage packaging, Europe: Consists of operations in several countries in Europe, which manufacture and sell metal beverage containers, extruded aluminum aerosol containers and aluminum slugs.

Metal food and household products packaging, Americas: Consists of operations in the U.S., Canada and Argentina, which manufacture and sell metal food, aerosol, paint and general line containers, as well as decorative specialty containers and aluminum slugs.

Aerospace and technologies: Consists of the manufacture and sale of aerospace and other related products and the providing of services used in the defense, civil space and commercial space industries.

Ball Corporation
Notes to Unaudited Condensed Consolidated Financial Statements

3. Business Segment Information (continued)

The accounting policies of the segments are the same as those in the unaudited condensed consolidated financial statements. A discussion of the company's critical and significant accounting policies can be found in Ball's annual report. The company also has investments in companies in the U.S. and Vietnam, which are accounted for under the equity method of accounting and, accordingly, those results are not included in segment sales or earnings.

Summary of Business by Segment

Segment assets	7,143.2	6,996.7
Corporate assets, net of eliminations	296.3	287.9
Total assets	\$ 7,439.5	\$ 7,284.6

4. Acquisitions
Qingdao M.C. Packaging Ltd. (QMCP)

In October 2011, Ball acquired the remaining 60 percent interest in a joint venture metal beverage container facility in Qingdao, PRC. As a result of purchase accounting, the company recorded a gain of \$9.2 million in equity in results of affiliates, related to the previously held interest in the joint venture. The acquisition of the remaining interest is not material to the metal beverage packaging, Americas and Asia, segment.

Aerocan S.A.S. (Aerocan)

In January 2011, the company acquired Aerocan for €221.7 million (\$295.2 million) in cash and assumed debt, net of \$26.2 million of cash acquired. Aerocan is a leading European manufacturer of extruded aluminum aerosol containers, and the aluminum slugs used to make them, for customers in the personal care, pharmaceutical, beverage and food industries. It operates three aerosol container manufacturing facilities — one each in the Czech Republic, France and the United Kingdom — and is a 51 percent owner of a joint venture aluminum slug facility in France. The acquisition of Aerocan allows Ball to expand into a new product category that is growing faster than other parts of our business, while aligning with a new customer base at returns that meet or exceed the company's cost of capital. The acquired operations have been included in the metal beverage packaging, Europe, segment since the acquisition date.

Management's fair market valuation of acquired assets and liabilities is summarized below. The valuation was based on market and income approaches.

(\$ in millions)	
Other assets and liabilities, net	\$ 6.5
Property, plant and equipment	95.8
Goodwill	167.3
Other intangible assets	53.9
Deferred taxes	(22.3)
Noncontrolling interest	(6.0)
Net assets acquired	\$ 295.2

Certain customer contracts, customer relationships and developed technology were identified as intangible assets by the company and assigned estimated useful lives between 5 and 12 years. The intangible assets are being amortized on a straight-line basis.

Ball Corporation
Notes to Unaudited Condensed Consolidated Financial Statements

6. Business Consolidation Activities (continued)

2012

Metal Beverage Packaging, Americas and Asia

The company recorded charges of \$1.7 million in the first quarter of 2012 and a reversal of an accrual of \$0.3 million in the second quarter for ongoing plant closure costs, primarily related to the company's closure of its Torrance, California, U.S., beverage can manufacturing facility (discussed further in the 2011 section below).

Metal Beverage Packaging, Europe, and Corporate

The first and second quarters included charges of \$2.5 million and \$2.9 million for implementation costs incurred in connection with the planned relocation of the company's European headquarters from Germany to Switzerland in the third quarter of 2012.

An additional \$0.4 million of net charges were recorded in the first six months of 2012, primarily to reflect individually insignificant charges related to previously announced business consolidation and other activities.

2011

In January 2011, Ball announced plans to close its Torrance, California, U.S., beverage can manufacturing facility; relocate a 12-ounce can line from the Torrance facility to its Whitby, Ontario, Canada, facility; and expand specialty can production in its Fort Worth, Texas, U.S., facility. The company recorded initial charges of \$10.5 million and \$2.2 million during the first and second quarters of 2011, respectively, in connection with these activities. Of the total \$12.7 million recorded in the first six months, \$8.5 million represented severance, pension and other employee benefits; \$2.3 million represented the impairment of the plant facility to its net realizable value and \$1.9 million represented accelerated depreciation. The impairment charge was subsequently reversed during the third quarter of 2011 and the land and building were sold during the fourth quarter of 2011 for a gain of \$6.9 million.

An additional \$0.7 million of net charges were recorded in the first quarter of 2011, primarily to reflect individually insignificant charges related to previously announced plant closures.

Metal Beverage Packaging, Europe

In connection with the acquisition of Aerocan discussed in Note 4, the company recorded charges totaling \$2.9 million for transaction costs, which were expensed as incurred.

7. Receivables

(\$ in millions)	July 1, 2012	December 31, 2011
Trade accounts receivable (net of allowance for doubtful accounts of \$13.9 at July 1, 2012, and \$13.4 at December 31, 2011)	\$ 1,074.0	\$ 840.6
Other receivables	69.1	69.8
	<u>\$ 1,143.1</u>	<u>\$ 910.4</u>

Ball Corporation

Notes to Unaudited Condensed Consolidated Financial Statements

12. Debt (continued)

On March 9, 2012, Ball issued \$750 million of 5.00 percent senior notes due in March 2022. On the same date, the company tendered for the redemption of its 6.625 percent senior notes originally due in March 2018 in the amount of \$450 million, at a redemption price per note of 102.583 percent of the outstanding principal amount plus accrued interest. The company redeemed \$392.7 million during the first quarter of 2012, and the remaining \$57.3 million was redeemed during the second quarter. The redemption of the bonds resulted in a charge of \$15.1 million for the call premium and the write off of unamortized financing costs and premiums. The charge is included as a component of interest expense in the unaudited condensed consolidated statement of earnings.

The senior credit facilities bear interest at variable rates and include the term loans described in the table above, as well as a long-term, multi-currency committed revolving credit facility that provides the company with up to the U.S. dollar equivalent of \$1 billion. An amendment to the company's existing credit agreement was finalized in July 2012 to reflect the addition and deletion of various legal entities as borrowers, primarily as a result of the relocation of Ball's European headquarters to Switzerland, and to ensure compliance with Swiss laws and regulations. The amendment also reflects modifications, including increasing various covenant baskets that are available to the company.

At July 1, 2012, taking into account outstanding letters of credit and facility borrowings, approximately \$963 million was available under the company's long-term, multi-currency committed revolving credit facilities, which are available until December 2015. In addition to the long-term, multi-currency committed credit facilities, the company had approximately \$530 million of short-term uncommitted credit facilities available at the end of the quarter, of which \$178.8 million was outstanding and due on demand.

The company has an accounts receivable securitization agreement for a term of three years. The maximum the company can borrow under this agreement can vary between \$150 million and \$275 million depending on the seasonal accounts receivable balances in the company's North American packaging businesses. At July 1, 2012, and December 31, 2011, \$210.0 million and \$231.0 million of accounts receivable were sold under this agreement, respectively. Borrowings under the securitization agreement are included within the short-term debt and current portion of long-term debt line on the balance sheet.

The fair value of the long-term debt at July 1, 2012, and at December 31, 2011, approximated its carrying value. The fair value reflects the market rates at each period end for debt with credit ratings similar to the company's ratings. Rates currently available to the company for loans with similar terms and maturities are used to estimate the fair value of long-term debt based on discounted cash flows.

The senior notes and senior credit facilities are guaranteed on a full, unconditional and joint and several basis by certain of the company's wholly owned domestic subsidiaries. Certain foreign denominated tranches of the senior credit facilities are similarly guaranteed by certain of the company's wholly owned foreign subsidiaries. Note 20 contains further details as well as required unaudited condensed consolidating financial information for the company, segregating the guarantor subsidiaries and non-guarantor subsidiaries as defined in the senior notes agreements.

The U.S. note agreements, bank credit agreement and accounts receivable securitization agreement contain certain restrictions relating to dividend payments, share repurchases, investments, financial ratios, guarantees and the incurrence of additional indebtedness. The most restrictive of the company's debt covenants require the company to maintain an interest coverage ratio (as defined in the agreements) of no less than 3.50 and a leverage ratio (as defined) of no greater than 4.00. The company was in compliance with all loan agreements and debt covenants at July 1, 2012, and December 31, 2011, and has met all debt payment obligations.

The Latapack-Ball debt facilities contain various covenants and restrictions but are non-recourse to Ball Corporation and its wholly owned subsidiaries.

Contributions to the company's defined global benefit pension plans, not including the unfunded German plans, were \$101.5 million in the first six months of 2012 (\$8.9 million in 2011). The total contributions to these funded plans are expected to be approximately \$110 million for the full year. This estimate may change based on changes in the Pension Protection Act and actual plan asset performance, among other factors. Payments to participants in the unfunded German plans were \$11.0 million (€8.5 million) in the first six months of 2012 and are expected to be approximately \$22 million (approximately €17 million) for the full year.

		Benefits (Net of Tax)		
December 31, 2011	\$ 84.7	\$ (381.5)	\$ (38.4)	\$ (335.2)
Change	(29.4)	14.5	(3.0)	(17.9)
July 1, 2012	<u>\$ 55.3</u>	<u>\$ (367.0)</u>	<u>\$ (41.4)</u>	<u>\$ (353.1)</u>

Share Repurchase Agreements

On February 1, 2012, in a privately negotiated transaction, Ball entered into an accelerated share repurchase agreement to buy \$200 million of its common shares using cash on hand and available borrowings. The company advanced the \$200 million on February 3, 2012, and received 4,584,819 shares, which represented 90 percent of the total shares as calculated using the closing price on January 31, 2012. The agreement was settled in May 2012, and the company received an additional 334,039 shares, which represented a weighted average price of \$40.66 for the contract period.

On October 28, 2011, in a privately negotiated transaction, Ball entered into an accelerated share repurchase agreement to buy \$100 million of its common shares using cash on hand and available borrowings. The company advanced the \$100 million on November 2, 2011, and received 2,523,836 shares, which represented 90 percent of the total shares as calculated using the closing price on October 28, 2011. The agreement was settled in January 2012, and the company received an additional 361,615 shares, which represented a weighted average price of \$34.66 for the contract period.

On August 2, 2011, in a privately negotiated transaction, Ball entered into an accelerated share repurchase agreement to buy \$125 million of its common shares using cash on hand and available borrowings. The company advanced the \$125 million on August 5, 2011, and received 3,077,976 shares, which represented 90 percent of the total shares as calculated using the previous day's closing share price. The agreement was settled in September 2011, and the company received an additional 526,532 shares, which represented a weighted average price of \$34.68 for the contract period.

15

[Table of Contents](#)

Ball Corporation Notes to Unaudited Condensed Consolidated Financial Statements

15. Stock-Based Compensation Programs

The company has shareholder-approved stock option plans under which options to purchase shares of Ball common stock have been granted to officers and employees at the market value of the stock at the date of grant. Payment must be made at the time of exercise in cash or with shares of stock owned by the option holder, which are valued at fair market value on the date exercised. In general, options are exercisable in four equal installments commencing one year from the date of grant and terminating 10 years from the date of grant. A summary of stock option activity for the six months ended July 1, 2012, follows:

	Outstanding Options		Nonvested Options	
	Number of Shares	Weighted Average Exercise Price	Number of Shares	Weighted Average Grant Date Fair Value
Beginning of year	10,943,025	\$ 23.64	3,678,286	\$ 7.51
Granted	1,476,100	37.70	1,476,100	9.44
Vested			(1,470,706)	6.99
Exercised	(1,243,259)	17.83		
Canceled/forfeited	(84,450)	27.14	(84,450)	7.30
End of period	<u>11,091,416</u>	<u>26.13</u>	<u>3,599,230</u>	<u>8.52</u>
Vested and exercisable, end of period	<u>7,492,186</u>	23.03		
Reserved for future grants	<u>3,891,306</u>			

The options granted in January 2012 included 659,000 stock-settled stock appreciation rights, which have the same terms as the stock options. The weighted average remaining contractual term for all options outstanding at July 1, 2012, was 6.4 years and the aggregate intrinsic value (difference in exercise price and closing price at that date) was \$165.5 million. The weighted average remaining contractual term for options vested and exercisable at July 1, 2012, was 5.4 years and the aggregate intrinsic value was \$135.0 million.

The company received \$4.5 million from options exercised during the three months ended July 1, 2012, and the intrinsic value associated with these exercises was \$5.3 million. During the six months ended July 1, 2012, the company received \$17.9 million from options exercised, and the intrinsic value associated with exercises for that period was \$24.1 million. The tax benefit associated with the company's stock compensation programs was \$6.5 million and \$13.2 million for the second quarter and first six months of 2012, respectively, and was reported as other financing activities in the unaudited condensed consolidated statement of cash flows.

These options cannot be traded in any equity market. However, based on the Black-Scholes option pricing model, options granted in 2012 and 2011 have estimated weighted average fair values at the grant dates of \$9.44 and \$9.77 per share, respectively. The actual value an employee may realize will depend on the excess of the stock price over the exercise price on the date the option is exercised. Consequently, there is no assurance that the value realized by an employee will be at or near the value estimated. The fair values were estimated using the following weighted average assumptions:

	January 2012	January and April 2011
Expected dividend yield	1.06%	0.78%
Expected stock price volatility	30.22%	30.04%
Risk-free interest rate	0.84%	1.97%
Expected life of options (in years)	5.26	5.00

16

[Table of Contents](#)

Ball Corporation
Notes to Unaudited Condensed Consolidated Financial Statements

15. Stock-Based Compensation Programs (continued)

In addition to stock options, the company issues to officers and certain employees restricted shares and restricted stock units, which vest over various periods. Other than the performance-contingent grants discussed below, such restricted shares and restricted stock units generally vest in equal installments over five years. Compensation cost is recorded based upon the estimated fair value of the shares at the grant date.

Following is a summary of restricted stock activity for the three months ended July 1, 2012:

	Number of Shares/Units	Weighted Average Grant Price
Beginning of year	1,818,234	\$ 24.86
Granted	383,314	\$ 39.10
Vested	(393,768)	\$ 20.49
Canceled/forfeited	(22,342)	\$ 30.06
End of period	<u>1,785,438</u>	<u>\$ 28.81</u>

In January 2012 and 2011, the company's board of directors granted 223,600 and 210,330 performance-contingent restricted stock units, respectively, to key employees, which will cliff-vest if the company's return on average invested capital during a 36-month performance period is equal to or exceeds the company's cost of capital. If the performance goals are not met, the shares will be forfeited. Current assumptions are that the performance targets will be met and, accordingly, grants under the plan are being accounted for as equity awards and compensation expense is recorded based upon the closing market price of the shares at the grant date. On a quarterly basis, the company reassesses the probability of the goals being met and adjusts compensation expense as appropriate. No such adjustment was considered necessary during the first six months of 2012 for either grant.

For the three and six months ended July 1, 2012, the company recognized expense of \$6.8 million (\$4.1 million after tax) and \$13.6 million (\$8.3 million after tax), respectively, for share-based compensation arrangements in selling, general and administrative expenses. For the three and six months ended July 3, 2011, the company recognized expense of \$5.9 million (\$3.6 million after tax) and \$12.3 million (\$7.5 million after tax) for such arrangements. At July 1, 2012, there was \$55.2 million of total unrecognized compensation costs related to nonvested share-based compensation arrangements. This cost is expected to be recognized in earnings over a weighted average period of 2.5 years.

16. Earnings and Dividends Per Share

(\$ in millions, except per share amounts; shares in thousands)	Three months ended		Six months ended	
	July 1, 2012	July 3, 2011	July 1, 2012	July 3, 2011

Per basic share	\$ 0.90	\$ 0.86	\$ 1.46	\$ 1.39
Per diluted share	\$ 0.88	\$ 0.84	\$ 1.42	\$ 1.37

[Table of Contents](#)

Ball Corporation
Notes to Unaudited Condensed Consolidated Financial Statements

16. Earnings and Dividends Per Share (continued)

Certain outstanding options were excluded from the diluted earnings per share calculation because they were anti-dilutive (i.e., the sum of the proceeds, including the unrecognized compensation and windfall tax benefits, exceeded the average closing stock price for the period). The options excluded totaled 1,449,000 and 2,714,110 in the three and six months ended July 1, 2012, respectively, and 1,331,310 in both the three and six months ended July 3, 2011.

The company declared and paid dividends of \$0.10 per share in each of the first two quarters of 2012 and \$0.07 per share in each of the first two quarters of 2011.

17. Financial Instruments and Risk Management

The company employs established risk management policies and procedures, which seek to reduce the company's exposure to fluctuations in commodity prices, interest rates, currency exchange rates and prices of the company's common stock with regard to common share repurchases and the company's deferred compensation stock plan. However, there can be no assurance that these policies and procedures will be successful. Although the instruments utilized involve varying degrees of credit, market and interest risk, the counterparties to the agreements are expected to perform fully under the terms of the agreements. The company monitors counterparty credit risk, including lenders, on a regular basis, but Ball cannot be certain that all risks will be discerned or that its risk management policies and procedures will always be effective.

Commodity Price Risk

Aluminum

The company manages commodity price risk in connection with market price fluctuations of aluminum ingot through two different methods. First, the company enters into container sales contracts that include aluminum ingot-based pricing terms that generally reflect the same price fluctuations under commercial supply contracts for aluminum sheet purchases. The terms include fixed, floating or pass-through aluminum ingot component pricing. Second, the company uses certain derivative instruments such as option

and forward contracts as economic and cash flow hedges of commodity price risk where there is not an arrangement in the sales contract to match underlying purchase volumes and pricing with sales volumes and pricing.

The company had aluminum contracts limiting its aluminum exposure with notional amounts of approximately \$507 million at July 1, 2012. The aluminum contracts include economic derivative instruments that are undesignated and receive mark to fair value accounting treatment, as well as cash flow hedges that offset sales contracts of various terms and lengths. Cash flow hedges relate to forecasted transactions that expire within the next five years. Included in shareholders' equity at July 1, 2012, within accumulated other comprehensive earnings (loss) is a net after-tax loss of \$36.5 million associated with these contracts. A net loss of \$36.4 million is expected to be recognized in the consolidated statement of earnings during the next 12 months, the majority of which will be offset by pricing changes in sales and purchase contracts, thus resulting in little or no earnings impact to Ball.

Steel

Most sales contracts involving our steel products either include provisions permitting the company to pass through some or all steel cost changes incurred, or they incorporate annually negotiated steel prices.

Interest Rate Risk

The company's objective in managing exposure to interest rate changes is to minimize the impact of interest rate changes on earnings and cash flows and to lower our overall borrowing costs. To achieve these objectives, the company may use a variety of interest rate swaps, collars and options to manage our mix of floating and fixed-rate debt. Interest rate instruments held by the company at July 1, 2012, included pay-fixed interest rate swaps, which effectively convert variable rate obligations to fixed-rate instruments.

[Table of Contents](#)

Ball Corporation

Notes to Unaudited Condensed Consolidated Financial Statements

17. Financial Instruments and Risk Management (continued)

At July 1, 2012, the company had outstanding interest rate swap contracts with notional amounts of approximately \$300 million paying fixed rates expiring within the next three years. Included in shareholders' equity at July 1, 2012, within accumulated other comprehensive earnings (loss) is a net after-tax loss of \$0.7 million associated with these contracts, of which \$0.6 million is expected to be recognized in the consolidated statement of earnings during the next 12 months.

Currency Exchange Rate Risk

The company's objective in managing exposure to currency fluctuations is to limit the exposure of cash flows and earnings from changes associated with currency exchange rate changes through the use of various derivative contracts. In addition, at times the company manages earnings translation volatility through the use of currency option strategies, and the change in the fair value of those options is recorded in the company's net earnings. The company's currency translation risk results from the currencies in which we transact business. The company faces currency exposures in our global operations as a result of various factors including intercompany currency denominated loans, purchasing raw materials in U.S. dollars and other currencies and tax exposures not denominated in the functional currency. Sales contracts are negotiated with customers to reflect cost changes and, where there is not an exchange pass-through arrangement, the company uses forward and option contracts to manage currency exposures. At July 1, 2012, the company had outstanding exchange forward contracts and option collar contracts with notional amounts totaling approximately \$622 million. Approximately \$4.2 million of net after-tax loss related to these contracts is included in accumulated other comprehensive earnings at July 1, 2012, of which \$2.5 million is expected to be recognized in the consolidated statement of earnings during the next 12 months. The contracts outstanding at July 1, 2012, expire within the next three years.

Common Stock Price Risk

The company's deferred compensation stock program is subject to variable plan accounting and, accordingly, is marked to fair value using the company's closing stock price at the end of the related reporting period. Based on current share levels in the program, each \$1 change in the company's stock price has an impact of \$1.7 million on pretax earnings. During March and September 2011, the company entered into total return swaps to reduce the company's earnings exposure to these market fluctuations. Based on the notional value of the total return swaps, each \$1 change in the company's stock price has an inverse impact to the deferred compensation stock program of \$1.5 million in pretax earnings. One of the swaps has a notional value of 500,000 shares and, after being renewed in July 2012, will be outstanding until September 2013. The other swap has a notional value of 1 million shares and will be outstanding until March 2013. As of July 1, 2012, the combined fair value of these swaps was a \$1.7 million loss. All gains and losses on the total return swaps are recorded in the consolidated statement of earnings in selling, general and administrative expenses.

Collateral Calls

The company's agreements with its financial counterparties require the company to post collateral in certain circumstances when the negative mark to fair value of the contracts exceeds specified levels. Additionally, the company has collateral posting arrangements with certain customers on these derivative contracts. The cash flows of the margin calls are shown within the investing section of the company's consolidated statements of cash flows. As of July 1, 2012, the aggregate fair value of all derivative instruments with credit-risk-related contingent features that were in a net liability position was \$61.4 million and no collateral was required to be posted. As of December 31, 2011, the aggregate fair value of all derivative instruments with credit-risk-related contingent features that were in a net liability position was \$71.7 million and no collateral was required to be posted.

Fair Value Measurements

The company has classified all applicable financial derivative assets and liabilities as Level 2 within the fair value hierarchy and presented those values in the tables below. The company's assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the valuation of fair value assets and liabilities and their placement within the fair value hierarchy levels.

Fair Value of Derivative Instruments as of July 1, 2012

(\$ in millions)	Derivatives Designated As Hedging Instruments	Derivatives Not Designated As Hedging Instruments	Total
Assets:

The company uses closing spot and forward market prices as published by the London Metal Exchange, the New York Mercantile Exchange, Reuters and Bloomberg to determine the fair value of its aluminum, currency, energy, inflation and interest rate spot and forward contracts. Option contracts are valued using a Black-Scholes model with observable market inputs for aluminum, currency and interest rates. The company values each of our financial instruments either internally using a single valuation technique or from a reliable observable market source. The company does not adjust the value of its financial instruments except in determining the fair value of a trade that settles in the future by discounting the value to its present value using 12-month LIBOR as the discount factor. Ball performs validations of our internally derived fair values reported for our financial instruments on a quarterly basis utilizing counterparty valuation statements. The company additionally evaluates counterparty creditworthiness and, as of July 1, 2012, has not identified any circumstances requiring that the reported values of our financial instruments be adjusted.

Net receivables related to the European scrap metal program totaling \$14.2 million at July 1, 2012, and \$10.6 million at December 31, 2011, were classified as Level 2 within the fair value hierarchy.

Total	\$ (20.2)	\$ (33.6)	\$ (3.0)	\$ (26.9)

18. Contingencies

Ball is subject to numerous lawsuits, claims or proceedings arising out of the ordinary course of business, including actions related to product liability; personal injury; the use and performance of company products; warranty matters; patent, trademark or other intellectual property infringement; contractual liability; the conduct of the company's business; tax reporting in domestic and foreign jurisdictions; workplace safety; and environmental and other matters. The company has also been identified as a potentially responsible party (PRP) at several waste disposal sites under U.S. federal and related state environmental statutes and regulations and may have joint and several liability for

any investigation and remediation costs incurred with respect to such sites. Some of these lawsuits, claims and proceedings involve substantial amounts, including as described below, and some of the environmental proceedings involve potential monetary costs or sanctions that may be material. Ball has denied liability with respect to many of these lawsuits, claims and proceedings and is vigorously defending such lawsuits, claims and proceedings. The company carries various forms of commercial, property and casualty, and other forms of insurance; however, such insurance may not be applicable or adequate to cover the costs associated with a judgment against Ball with respect to these lawsuits, claims and proceedings. The company does not believe that these lawsuits, claims and proceedings are material individually or in the aggregate. While management believes the company has established adequate accruals for expected future liability with respect to pending lawsuits, claims and proceedings, where the nature and extent of any such liability can be reasonably estimated based upon then presently available information, there can be no assurance that the final resolution of any existing or future lawsuits, claims or proceedings will not have a material adverse effect on the liquidity, results of operations or financial condition of the company.

As previously reported in 2010, the company was served with a claim by Hess Corporation (Hess) in the U.S. District Court for the Northern District of New York. Hess alleges that the company and certain affiliates breached an agreement to purchase electricity from Hess related to Ball Plastic Container Corp.'s (Ball Plastic) former Baldwinsville, New York, plant and claims damages in the range of \$5 million. Discovery was completed and both parties filed motions for summary judgment. On April 25, 2012, the District Court granted Hess' motion, finding that because Ball Plastic closed its plastics plant and did not give Hess timely notice, Ball Plastic breached the agreement. The Court stated that damages could be resolved at trial; however, it strongly encouraged the parties to negotiate a settlement agreement regarding damages, and the parties will be meeting to seek to do so during the third quarter. Based on the information available to the company at the present time, the company does not believe that this matter will have a material adverse effect upon the liquidity, results of operations or financial condition of the company.

[Table of Contents](#)

Ball Corporation
Notes to Unaudited Condensed Consolidated Financial Statements

18. Contingencies (continued)

As previously reported, in 2005 Ball Metal Beverage Container Corp. (BMBCC), a wholly owned subsidiary of the company, was served with an amended complaint filed by Crown Packaging Technology, Inc. et al. (Crown), in the U.S. District Court for the Southern District of Ohio, U.S., Western Division at Dayton, Ohio, U.S. The complaint alleges that the manufacture, sale and use of certain ends by BMBCC and its customers infringes certain claims of Crown's U.S. patents. The complaint seeks unspecified monetary damages, fees, and declaratory and injunctive relief. BMBCC has formally denied the allegations of the complaint. In September 2009, the District Court granted the portion of Ball's motion for summary judgment that addressed invalidity, holding that the asserted patent claims were invalid for failure to comply with the written description requirement and because they were anticipated by prior art. Crown appealed to the U.S. Circuit Court of Appeals for the Federal Circuit, which reversed the District Court's decision by a two-to-one majority in April 2011. BMBCC's petition to the appellate court for a rehearing of the case was denied in June 2011. The case was remanded to the District Court, which then addressed the non-infringement portion of BMBCC's motion for summary judgment that the court had previously elected not to decide. On January 31, 2012, the District Court granted BMBCC's motion for non-infringement, and Crown has appealed this decision to the U.S. Circuit Court of Appeals for the Federal Circuit. Based on the information available to the company at the present time, the company does not believe that this matter will have a material adverse effect upon the liquidity, results of operations or financial condition of the company.

As previously reported, the U.S. Environmental Protection Agency (USEPA) considers the company a PRP with respect to the Lowry Landfill site located east of Denver, Colorado. In 1992, the company was served with a lawsuit filed by the City and County of Denver (Denver) and Waste Management of Colorado, Inc., seeking contributions from the company and approximately 38 other companies. The company filed its answer denying the allegations of the complaint. Subsequently in 1992, the company was served with a third-party complaint filed by S.W. Shattuck Chemical Company, Inc., seeking contribution from the company and other companies for the costs associated with cleaning up the Lowry Landfill. The company denied the allegations of the complaint.

Also in 1992, Ball entered into a settlement and indemnification agreement with Chemical Waste Management, Inc., and Waste Management of Colorado, Inc. (collectively Waste Management) and Denver pursuant to which Waste Management and Denver dismissed their lawsuit against the company, and Waste Management agreed to defend, indemnify and hold harmless the company from claims and lawsuits brought by governmental agencies and other parties relating to actions seeking contributions or remedial costs from the company for the cleanup of the site. Waste Management, Inc., has agreed to guarantee the obligations of Waste Management. Waste Management and Denver may seek additional payments from the company if the response costs related to the site exceed \$319 million. In 2003 Waste Management, Inc., indicated that the cost of the site might exceed \$319 million in 2030, approximately three years before the projected completion of the project. The company might also be responsible for payments (based on 1992 dollars) for any additional wastes that may have been disposed of by the company at the site but which are identified after the execution of the settlement agreement. While remediating the site, contaminants were encountered, which could add an additional cleanup cost of approximately \$10 million. This additional cleanup cost could, in turn, add approximately \$1 million to total site costs for the PRP group.

At this time, there are no Lowry Landfill actions in which the company is actively involved. Based on the information available to the company at this time, we do not believe that this matter will have a material adverse effect upon the liquidity, results of operations or financial condition of the company.

Ball Corporation
Notes to Unaudited Condensed Consolidated Financial Statements

19. Indemnifications and Guarantees

General Guarantees

The company or its appropriate consolidated direct or indirect subsidiaries have made certain indemnities, commitments and guarantees under which the specified entity may be required to make payments in relation to certain transactions. These indemnities, commitments and guarantees include indemnities to the customers of the subsidiaries in connection with the sales of their packaging and aerospace products and services; guarantees to suppliers of subsidiaries of the company guaranteeing the performance of the respective entity under a purchase agreement, construction contract or other commitment; guarantees in respect of certain foreign subsidiaries' pension plans; indemnities for liabilities associated with the infringement of third party patents, trademarks or copyrights under various types of agreements; indemnities to various lessors in connection with facility, equipment, furniture and other personal property leases for certain claims arising from such leases; indemnities to governmental agencies in connection with the issuance of a permit or license to the company or a subsidiary; indemnities pursuant to agreements relating to certain joint ventures; indemnities in connection with the sale of businesses or substantially all of the assets and specified liabilities of businesses; and indemnities to directors, officers and employees of the company to the extent permitted under the laws of the State of Indiana and the United States of America. The duration of these indemnities, commitments and guarantees varies and, in certain cases, is

indefinite. In addition many of these indemnities, commitments and guarantees do not provide for any limitation on the maximum potential future payments the company could be obligated to make. As such, the company is unable to reasonably estimate its potential exposure under these items.

The company has not recorded any liability for these indemnities, commitments and guarantees in the accompanying consolidated balance sheets. The company does, however, accrue for payments under promissory notes and other evidences of incurred indebtedness and for losses for any known contingent liability, including those that may arise from indemnifications, commitments and guarantees, when future payment is both reasonably estimable and probable. Finally, the company carries specific and general liability insurance policies and has obtained indemnities, commitments and guarantees from third party purchasers, sellers and other contracting parties, which the company believes would, in certain circumstances, provide recourse to any claims arising from these indemnifications, commitments and guarantees.

Debt Guarantees

The company's senior notes and senior credit facilities are guaranteed on a full, unconditional and joint and several basis by certain of the company's material domestic subsidiaries and the domestic subsidiary borrowers, and obligations of the subsidiary borrowers under the senior credit facilities are guaranteed by the company. Loans borrowed under the senior credit facilities by foreign subsidiary borrowers are also effectively guaranteed by certain of the company's foreign subsidiaries by pledges of stock of the foreign subsidiary borrowers and stock of material foreign subsidiaries. These guarantees are required in support of the notes and credit facilities referred to above, are co-terminous with the terms of the respective note indentures and credit agreements and would require performance upon certain events of default referred to in the respective guarantees. The maximum potential amounts which could be required to be paid under the domestic guarantees are essentially equal to the then outstanding principal and interest under the respective notes and credit agreements, or under the applicable tranche, and the maximum potential amounts that could be required to be paid under the foreign stock pledges by foreign subsidiaries are essentially equal to the value of the stock pledged. The company is not in default under the above notes or credit facilities. The unaudited condensed consolidating financial information for the guarantor and non-guarantor subsidiaries is presented in Note 20. Separate financial statements for the guarantor subsidiaries and the non-guarantor subsidiaries are not presented because management has determined that such financial statements are not required by the current regulations.

Accounts Receivable Securitization

Ball Capital Corp. II is a separate, wholly owned corporate entity created for the purchase of accounts receivable from certain of the company's wholly owned subsidiaries. Ball Capital Corp. II's assets will be available first to satisfy the claims of its creditors. The company has been designated as the servicer pursuant to an agreement whereby Ball Capital Corp. II may sell and assign the accounts receivable to a commercial lender or lenders. As the servicer, the company is responsible for the servicing, administration and collection of the receivables and is primarily liable for the performance of such obligations. The company, the relevant subsidiaries and Ball Capital Corp. II are not in default under the above credit arrangement.

[Table of Contents](#)

20. Subsidiary Guarantees of Debt

The company's senior notes are guaranteed on a full, unconditional and joint and several basis by certain of the company's material domestic subsidiaries. Each of the guarantor subsidiaries is 100 percent owned by Ball Corporation. These guarantees are required in support of the notes, are co-terminous with the terms of the respective note indentures and would require performance upon certain events of default referred to in the respective guarantees. The maximum potential amounts that could be required to be paid under the domestic guarantees are essentially equal to the then outstanding principal and interest under the respective notes. The following is condensed, consolidating financial information (in millions of dollars) for the company, segregating the guarantor subsidiaries and non-guarantor subsidiaries, as of July 1, 2012, and December 31, 2011, and for the three and six months ended July 1, 2012. Separate financial statements for the guarantor subsidiaries and the non-guarantor subsidiaries are not presented because management has determined that such financial statements are not required by the current regulations.

During the first quarter of 2012, Ball revised the presentation of the unaudited condensed consolidating statement of earnings for the period ended July 3, 2011, and the unaudited condensed consolidating balance sheet at December 31, 2011. The revised presentation included a change in the equity earnings elimination and the attribution of equity earnings for Ball Corporation, the guarantor and the non-guarantor subsidiaries. The revision in the Ball Corporation, guarantor and non-guarantor subsidiaries within the unaudited condensed consolidating statement of earnings and balance sheet was assessed and deemed to be immaterial for all previously issued financial statement periods. As a result, the company has revised the previously issued condensed consolidating financial statements included in this filing. The company is also in the process of finalizing the calculations for the other prior periods and will disclose the effects for the corresponding comparable prior periods. These revisions had no impact on any consolidated total of the unaudited condensed consolidating financial statements.

The revisions for the unaudited condensed consolidating statement of earnings for the three and six months ended July 3, 2011, included increases in equity in results of subsidiaries in the guarantor subsidiaries of \$80.8 million and \$143.4 million, respectively, and corresponding increases in the eliminations adjustment. This revision also resulted in an increase of the same magnitude in the net earnings attributable to Ball Corporation for the guarantor subsidiaries and a corresponding increase in the eliminations adjustment. The revisions for the unaudited condensed consolidating balance sheet at December 31, 2011, included a decrease in investment in subsidiaries of \$117.7 million for Ball Corporation and an increase of \$1,399.9 million for the guarantor subsidiaries, respectively, with a corresponding net increase in the eliminations adjustment. Additionally, the unaudited condensed consolidating balance sheet includes an increase in Ball Corporation shareholders' equity of \$1,400.6 million in the guarantor subsidiaries and a decrease in Ball Corporation shareholders' equity of \$118.3 million and \$1,282.3 million in the non-guarantor subsidiaries and eliminations adjustments, respectively.

Additionally, intercompany asset and liability account balances have been presented on a gross basis for all periods presented. The intercompany presentation had no impact on any consolidated financial statements or footnotes.

Item 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management’s discussion and analysis should be read in conjunction with the unaudited condensed consolidated financial statements and accompanying notes included in Item 1 of this report, which include additional information about our accounting policies, practices and the transactions underlying our financial results. The preparation of our unaudited condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP) requires us to make estimates and assumptions that affect the reported amounts in our unaudited condensed consolidated financial statements and the accompanying notes including various claims and contingencies related to lawsuits, taxes, environmental and other matters arising during the normal course of business. We apply our best judgment, our knowledge of existing facts and circumstances and our knowledge of actions that we may undertake in the future in determining the estimates that will affect our unaudited condensed consolidated financial statements. We evaluate our estimates on an ongoing basis using our historical experience, as well as other factors we believe appropriate under the circumstances, such as current economic conditions, and adjust or revise our estimates as circumstances change. As future events and their effects cannot be determined with precision, actual results may differ from these estimates. Ball Corporation and its controlled affiliates are referred to collectively as “Ball Corporation,” “Ball,” “the company” or “we” or “our” in the following discussion and analysis.

BUSINESS OVERVIEW

Business Overview

Ball Corporation is one of the world’s leading suppliers of metal packaging to the beverage, food, personal care and household products industries. Our packaging products are produced for a variety of end uses, are manufactured in facilities around the world and are competitive with other substrates, such as plastics and glass. We also provide aerospace and other technologies and services to governmental and commercial customers.

We sell our packaging products mainly to large, multinational beverage, food, personal care and household products companies with which we have developed long-term customer relationships. This is evidenced by our high customer retention and our large number of long-term supply contracts. While we have a diversified customer base, we sell a majority of our packaging products to relatively few major companies in North America, Europe, the PRC, Brazil and Argentina, as do our equity joint ventures in the U.S. and Vietnam. The primary customers for the products and services provided by our aerospace and technologies segment are U.S. government agencies or their prime contractors.

We purchase our raw materials from relatively few suppliers. We also have exposure to inflation, in particular the rising costs of raw materials, as well as other inputs into our direct costs. We mitigate our exposure to the changes in the costs of metal through the inclusion of provisions in a majority of our packaging sales contracts to pass through metal price changes, as well as through the use of derivative instruments. The pass-through provisions generally result in proportional increases or decreases in sales and earnings with a greatly reduced impact, if any, on margin dollars. Because of our customer and supplier concentration, our business, financial condition and results of operations could be adversely affected by the loss, insolvency or bankruptcy of a major customer or supplier or a change in a supply agreement with a major customer or supplier, although our contract provisions generally mitigate the risk of customer loss, and our long-term relationships represent a known, stable customer base.

Industry Trends and Corporate Strategy

In the rigid packaging industry, sales and earnings can be improved by reducing costs, increasing prices, developing new products, expanding volumes and making strategic acquisitions. Over the past few years, we have closed a number of packaging facilities in support of our ongoing objective of matching our supply with market demand. We have also identified and implemented plans to improve our return on invested capital through the redeployment of assets within our global operations. To better realign capacity, in 2011 we closed our Torrance, California, U.S., facility, relocated one of the lines to our Whitby, Ontario, Canada, facility; relocated the scheduled line in Lublin, Poland, to our Belgrade, Serbia, facility; reduced capacity in our Columbus, Ohio, U.S., metal beverage facility and redeployed surplus equipment to other global locations.

As part of our Drive for 10 vision, we are focused on developing and marketing new and existing products that meet the needs of our customers and the ultimate consumer. We continue to place emphasis on innovation throughout our businesses and will do so in 2012 and beyond. These innovations include new shapes, sizes, opening features and other functional benefits, as well as increasing the use of recycled content and lightweighting of our packages. This ongoing packaging development activity helps us maintain and expand our supply positions with major beverage, food, personal care and

35

[Table of Contents](#)

household products customers. Our sustainability vision encompasses balancing economic, environmental and social impacts in our decision making and activities. Successfully executing this vision will create long-term, shared value for our stakeholders, and Ball is committed to practicing sustainability as a way of doing business. Our sustainability report and updates on our progress are available at www.ball.com/sustainability.

The North American metal beverage container manufacturing industry is relatively mature, and industry volumes for certain types of containers have declined over the past several years. Late in the second quarter of 2012, we were notified of a reduction in standard 12-ounce can requirements for a Beverage, Americas, customer, starting in January 2013. Some of this reduction in volume will be offset with growing demand for specialty container volumes from new and existing customers. We will continue to realign our manufacturing footprint to meet market demand, which will include both permanent and temporary capacity realignment. The metal beverage container industries in other parts of the world are growing and are expected to continue to grow in the medium to long term. We have been able to capitalize on this growth by adding a facility, as well as additional capacity, in our Latapack-Ball, consolidated Brazilian joint venture and by increasing capacity in some of our European metal beverage container manufacturing facilities by speeding up certain lines and by expansion. We have also added capacity in Asia, as described below.

In 2011, we expanded our lightweight Alumi-Tek® bottle production to our Golden, Colorado, U.S., facility, and we commenced specialty can production in our Fort Worth, Texas, U.S., facility. We also announced that Latapack-Ball would construct a new metal beverage container manufacturing facility in Alagoinhas, Bahia, which is in northeast Brazil, one of the fastest growing regions of the country. The new facility began production in the first quarter of 2012 with output from the first line contracted for sale under a long-term agreement. Additionally, in March 2011 we entered into a joint venture agreement with Thai Beverage Can Limited to construct a beverage container manufacturing facility in Vietnam that began production in the first quarter of 2012. We constructed a new expanded beverage container facility in Qingdao, PRC, and began production in the second quarter of 2012.

We have also made recent strategic acquisitions. In October 2011, Ball acquired the remaining 60 percent interest in a joint venture metal beverage container facility in Qingdao, PRC. In July 2010, we entered the aluminum slug market by acquiring the leading North American manufacturer of aluminum slugs used to make extruded aerosol containers, beverage bottles, collapsible tubes and technical impact extrusions. To further expand this new product line and broaden our market development efforts into a new customer base, in January 2011, we acquired a leading European supplier of aluminum aerosol containers and bottles and the slugs used to make them. Further details of recent acquisitions are included in Note 4 to the unaudited condensed consolidated financial statements within Item 1 of this report.

We recognize sales under long-term contracts in the aerospace and technologies segment using percentage of completion under the cost-to-cost method of accounting. The contract mix in the first six months of 2012 consisted of approximately 62 percent cost-type contracts, which are billed at our costs plus an agreed upon and/or earned profit component, and 30 percent fixed-price contracts. The remainder represents time and material contracts, which typically provide for the sale of engineering labor at fixed hourly rates. The contracted backlog at July 1, 2012, of approximately \$780 million consisted of approximately 54 percent fixed price contracts.

Throughout the period of contract performance, we regularly reevaluate and, if necessary, revise our estimates of aerospace and technologies total contract revenue, total contract cost and progress toward completion. Because of contract payment schedules, limitations on funding and other contract terms, our sales and accounts receivable for this segment include amounts that have been earned but not yet billed.

Management Performance Measures

Management uses various measures to evaluate company performance such as return on average invested capital (net operating earnings after tax over the relevant performance period divided by average invested capital over the same period); economic value added (EVA®) and EVA® dollars (net operating earnings after tax less a capital charge on average invested capital employed); earnings before interest and taxes (EBIT); earnings before interest, taxes, depreciation and amortization (EBITDA); diluted earnings per share; cash flow from operating activities and free cash flow (generally defined by the company as cash flow from operating activities less additions to property, plant and equipment). These financial measures may be adjusted at times for items that affect comparability between periods such as business consolidation costs and gains or losses on acquisitions and dispositions. Nonfinancial measures in the packaging businesses include production efficiency and spoilage rates; quality control figures; environmental, health and safety statistics; production and sales volumes; asset utilization rates; and measures of sustainability. Additional measures used to evaluate financial performance in the aerospace and technologies segment include contract revenue realization, award and incentive fees realized, proposal win rates and backlog (including awarded, contracted and funded backlog).

[Table of Contents](#)

RESULTS OF CONSOLIDATED OPERATIONS

Consolidated Sales and Earnings

(\$ in millions)	Three months ended		Six months ended	
	July 1, 2012	July 3, 2011	July 1, 2012	July 3, 2011
Net sales	\$ 2,296.3	\$ 2,309.7	\$ 4,339.0	\$ 4,320.9
Net earnings attributable to Ball Corporation	139.5	143.1	227.8	234.4
Net earnings attributable to Ball Corporation as a % of consolidated net sales	6.1%	6.2%	5.3%	5.4%

Sales in the second quarter and first six months of 2012 were flat compared to the same periods of 2011 with higher beverage container sales volumes in Brazil, the PRC and Europe being offset by lower sales volumes in North America beverage and food and household containers and unfavorable currency translation exchange rates in Europe. Earnings in the packaging segments were favorably impacted by improved pricing and product sales mix, while negatively impacted by price/cost compression in some markets and new plant start up costs. In addition to the business segment performance analyzed below, net earnings attributable to Ball Corporation included discontinued operations related to the sale of the plastics business in August 2010, business consolidation costs, debt refinancing costs, equity earnings and a lower tax rate in 2012. These items are detailed in the “Management Performance Measures” section below.

Cost of Sales (Excluding Depreciation and Amortization)

Cost of sales, excluding depreciation and amortization, was \$1,890.8 million and \$3,578.5 million in the second quarter and first six months of 2012, respectively, compared to \$1,885.5 million and \$3,516.2 million for the same periods of 2011, respectively. These amounts represented 82.3 percent and 82.5 percent of consolidated net sales for the second quarter and first six months of 2012, respectively, compared to 81.6 percent and 81.4 for the same periods of 2011, respectively.

Depreciation and Amortization

Depreciation and amortization expense was \$66.5 million and \$135.5 million in the second quarter and first six months of 2012, respectively, compared to \$74.1 million and \$147.7 million for the same periods of 2011, respectively. These amounts represented 2.9 percent and 3.1 percent of consolidated net sales for the second quarter and first six months of 2012, respectively, compared to 3.2 percent and 3.4 percent for the same periods of 2011, respectively. The lower depreciation and expense in 2012 compared to 2011 was primarily due to the revision of estimated useful lives of certain equipment and tooling. Further details of the revised estimates are available in Note 1 accompanying the unaudited condensed consolidated financial statements included within Item 1 of this report.

Selling, General and Administrative

Selling, general and administrative (SG&A) expenses were \$98.6 million and \$198.2 million in the second quarter and first six months of 2012, respectively, which are comparable to \$93.1 million and \$192.5 million for the same periods in 2011, respectively. These amounts represented 4.3 percent and 4.6 percent of consolidated net sales for the second quarter and first six months of 2012, respectively, compared to 4.0 percent and 4.5 percent for the same periods of 2011, respectively. There were no individually significant items affecting comparability between the periods.

Interest and Taxes

Consolidated interest expense was \$44.7 million and \$105.1 million in the second quarter and first six months of 2012, respectively, compared to \$45.2 million and \$91.7 million for the same periods in 2011, respectively. Interest expense in the first quarter of 2012 included \$15.1 million for the call premium and the write off of unamortized financing costs and issuance premiums related to the tender of Ball's 6.625 percent senior notes due March 2018. Interest expense in 2012 compared to 2011, excluding debt refinancing costs, was slightly less due to lower interest rates, partially offset by higher levels of debt, including the issuance of \$750 million of senior notes in March 2012. Interest expense as a percentage of average monthly borrowings was 5.4 percent in both the second quarter and first six months of 2012 compared to 5.3 percent and 5.5 percent for the same periods in 2011, respectively.

[Table of Contents](#)

The effective income tax rate for earnings from continuing operations was 24.8 percent for the first six months of 2012 compared to 31.6 percent for the first six months of 2011. The lower rate in 2012 was primarily the net result of the release of various income tax reserves reviewed by, and settled with, various taxing jurisdictions and a lower income tax rate on foreign earnings. The full-year 2012 effective income tax rate on continuing operations is expected to be approximately 29 percent.

Equity in Results of Affiliates

In October 2011, we acquired our partners' 60 percent equity interests in QMCP, and our joint venture in Vietnam began production of metal beverage containers in the first quarter of 2012.

RESULTS OF BUSINESS SEGMENTS

Metal Beverage Packaging, Americas and Asia

(\$ in millions)	Three months ended		Six months ended	
	July 1, 2012	July 3, 2011	July 1, 2012	July 3, 2011
Net sales	\$ 1,207.6	\$ 1,164.1	\$ 2,257.3	\$ 2,196.4
Segment earnings	\$ 136.8	\$ 126.1	\$ 242.3	\$ 241.7
Business consolidation and other activities (a)	0.3	(2.5)	(1.4)	(13.4)
Total segment earnings	\$ 137.1	\$ 123.6	\$ 240.9	\$ 228.3
Segment earnings before business consolidation costs as a % of segment net sales	11.3%	10.8%	10.7%	11.0%

(a) Further details of these items are included in Note 6 to the unaudited condensed consolidated financial statements within Item 1 of this report.

The metal beverage packaging, Americas and Asia, segment consists of operations located in the U.S., Canada, Brazil and the PRC, which manufacture metal container products used in beverage packaging, as well as non-beverage plastic containers manufactured and sold mainly in the PRC. In October 2011, we completed the acquisition of QMCP in the PRC; further details are available in Note 4 to the financial statements.

Segment sales in the second quarter and first six months of 2012 were \$43.5 million and \$60.9 million higher compared to the same periods in 2011, respectively. The increase in the second quarter was primarily attributable to favorable product sales mix of \$26 million, higher sales volumes in the PRC and Brazil of \$17 million and the acquisition of QMCP, partially offset by lower volumes in North America of \$10 million. The higher sales in the first six months were primarily due to favorable product sales mix of \$45 million and the acquisition of QMCP of \$14 million.

Segment earnings in the second quarter and first six months of 2012 were \$10.7 million higher and flat compared to the same periods of 2011, respectively. The increase in second quarter earnings was primarily due to \$14 million of favorable pricing and product sales mix. Earnings in the first six months of 2012 were flat compared to 2011 due to favorable pricing and product sales mix of \$12 million, offset by unfavorable manufacturing performance.

[Table of Contents](#)

Metal Beverage Packaging, Europe

(\$ in millions)	Three months ended		Six months ended	
	July 1, 2012	July 3, 2011	July 1, 2012	July 3, 2011
Net sales	\$ 556.2	\$ 607.9	\$ 1,019.2	\$ 1,050.9
Segment earnings	\$ 65.7	\$ 84.7	\$ 119.4	\$ 137.8
Business consolidation and other activities (a)	(0.9)	(0.3)	(2.7)	(2.9)
Total segment earnings	\$ 64.8	\$ 84.4	\$ 116.7	\$ 134.9
Segment earnings before business consolidation costs as a % of segment net sales	11.8%	13.9%	11.7%	13.1%

(a) Further details of these items are included in Note 6 to the unaudited condensed consolidated financial statements within Item 1 of this report.

The metal beverage packaging, Europe, segment includes the manufacture of metal beverage containers, extruded aluminum aerosol containers and aluminum slugs. Ball has manufacturing facilities located in Germany, the United Kingdom, France, the Netherlands, Poland, Serbia and the Czech Republic. In January 2011, we acquired Aerocan S.A.S. (Aerocan), a leading European supplier of aluminum aerosol cans and bottles; further details are available in Note 4 accompanying the unaudited condensed consolidated financial statements included within Item 1 of this report.

Segment sales in the second quarter and first six months of 2012 decreased \$51.7 million and \$31.7 million compared to the same periods in 2011, respectively. The decrease in the second quarter was primarily due to unfavorable currency exchange effects of \$67 million, partially offset by higher sales volumes of \$13 million. The decrease in the first six months was due to unfavorable currency exchange effects of \$85 million, partially offset by higher sales volumes of \$35 million.

Segment earnings in the second quarter and first six months of 2012 decreased \$19.0 million and \$18.4 million compared to the same periods in 2011, respectively. The decrease in the second quarter was due to unfavorable euro translation effects of \$10 million and price/cost compression, partially offset by higher sales volumes. The decrease in the first six months was due to price/cost compression of \$23 million and unfavorable currency exchange effects, partially offset by higher sales volumes of \$17 million.

Metal Food and Household Products Packaging, Americas

(\$ in millions)	Three months ended		Six months ended	
	July 1, 2012	July 3, 2011	July 1, 2012	July 3, 2011
Net sales	\$ 327.6	\$ 345.7	\$ 658.0	\$ 690.4
Segment earnings	31.9	41.3	59.9	81.1
Segment earnings as a % of segment net sales	9.7%	11.9%	9.1%	11.7%

The metal food and household products packaging, Americas, segment consists of operations located in the U.S., Canada and Argentina that manufacture and sell metal food, aerosol, paint and general line containers, as well as decorative specialty containers and aluminum slugs.

Segment sales in the second quarter and first six months of 2012 were \$18.1 million and \$32.4 million lower compared to the same periods of 2011, respectively. Lower sales in the second quarter were primarily due to lower volumes of \$27 million from lower preseason sales and customer inventory reductions, partially offset by favorable pricing and mix. Lower sales in the first six months were from lower volumes of \$47 million, partially offset by favorable cost recovery and mix of \$15 million.

39

[Table of Contents](#)

Segment earnings in the second quarter and first six months of 2012 were \$9.4 million and \$21.2 million lower compared to the same periods of 2011, respectively. Lower earnings in the second quarter were primarily due to lower 2012 sales volumes and nonrecurring inventory holding gains in 2011, partially offset by improved manufacturing performance. Lower earnings in the first six months were primarily due to nonrecurring inventory holding gains in 2011 of \$16 million and lower 2012 sales volumes of \$11 million, partially offset by improved manufacturing performance.

Aerospace and Technologies

(\$ in millions)	Three months ended		Six months ended	
	July 1, 2012	July 3, 2011	July 1, 2012	July 3, 2011
Net sales	\$ 210.3	\$ 199.9	\$ 411.9	\$ 391.1
Segment earnings	20.2	21.7	39.9	40.4
Segment earnings as a % of segment net sales	9.6%	10.9%	9.7%	10.3%

The aerospace and technologies segment consists of the manufacture and sale of aerospace and other related products and the providing of services used in the defense, civil space and commercial space industries.

Segment sales in the second quarter and first six months of 2012 increased \$10.4 million and \$20.8 million compared to the same periods in 2011, respectively, primarily due to higher sales from U.S. national defense contracts, partially offset by lower sales from civil space programs. Segment earnings decreased slightly as a result of lower contributions from 2012 contract fee adjustments.

Contracted backlog in the aerospace and technologies segment was approximately \$780 million at July 1, 2012, compared to approximately \$897 million at December 31, 2011. Comparisons of backlog are not necessarily indicative of the trend of future operations due to the nature of varying delivery and milestone schedules on contracts and funding of programs.

Additional Segment Information

For additional information regarding our segments, see the business segment information in Note 3 accompanying the unaudited condensed consolidated financial statements included within Item 1 of this report. The charges recorded for business consolidation and other activities were based on estimates by management and were developed from information available at the time the amounts were recognized. If actual outcomes vary from the estimates, the differences will be reflected in current period earnings in the statement of earnings and identified as business consolidation gains and losses. Additional details about our business consolidation and other activities, as well as the associated costs, are provided in Note 6 accompanying the unaudited condensed consolidated financial statements included within Item 1 of this report.

NEW ACCOUNTING PRONOUNCEMENTS

For information regarding recent accounting pronouncements, see Note 2 to the unaudited condensed consolidated financial statements within Item 1 of this report on Form 10-Q.

40

[Table of Contents](#)

FINANCIAL CONDITION, LIQUIDITY AND CAPITAL RESOURCES

Our primary sources of liquidity are cash provided by operating activities and external committed borrowings. We believe that cash flows from operations and cash provided by short-term and committed revolver borrowings, when necessary, will be sufficient to meet our ongoing operating requirements, scheduled principal and interest payments on debt, dividend payments and anticipated capital expenditures. The following summarizes our cash flows:

(\$ in millions)	Six months ended	
	July 1, 2012	July 3, 2011
Cash flows provided by (used in) operating activities (including discontinued operations)	\$ 74.7	\$ 161.2
Cash flows provided by (used in) investing activities	(154.7)	(509.3)
Cash flows provided by (used in) financing activities	34.5	339.7

Cash flows from operations in the first six months of 2012 were lower than in the first six months of 2011 due to approximately \$95 million higher U.S. pension funding, partially offset by net favorable working capital changes. The favorable working capital changes in the first six months of 2012 compared to the changes in the first six months of 2011 were primarily related to lower days sales outstanding and more effective inventory management, partially offset by lower days payable outstanding. Days sales outstanding (annualized) decreased from 48 days to 45 days, inventory days on hand (annualized) decreased from 61 days to 52 days and days payable outstanding (annualized) decreased from 45 days to 43 days.

Contributions to the company's defined benefit plans, not including the unfunded German plans, are expected to be approximately \$110 million in 2012. This estimate may change based on changes in the Pension Protection Act and actual plan asset performance, among other factors. Payments to participants in the unfunded German plans are expected to be approximately \$22 million for the full year.

We expect 2012 capital expenditures for property, plant and equipment to be approximately \$350 million, and approximately \$133 million was contractually committed as of July 1, 2012. Capital expenditures are generally funded by cash flows from operations.

Share Repurchases

Our share repurchases, net of issuances, totaled \$248.7 million in the first six months of 2012 compared to \$241.1 million in the first six months of 2011. The repurchases were completed using cash on hand and available borrowings and included accelerated share repurchase agreements and other purchases under our ongoing share repurchase program. Additional details about our share repurchase activities are provided in Note 14 to the unaudited condensed consolidated financial statements within Item 1 of this report on Form 10-Q.

Debt Facilities and Refinancing

Given our cash flow projections and unused credit facilities that are available until December 2015, our liquidity is strong and is expected to meet our ongoing cash and debt service requirements. Interest-bearing debt of \$3.5 billion at July 1, 2012, was higher than the amount outstanding at December 31, 2011, of \$3.1 billion.

On March 9, 2012, Ball issued \$750 million of 5.00 percent senior notes due in March 2022. On the same date, the company tendered for the redemption of its 6.625 percent senior notes originally due in March 2018 in the amount of \$450 million, at a redemption price per note of 102.583 percent of the outstanding principal amount plus accrued interest. At April 1, 2012, \$392.7 million had been redeemed, and the remaining \$57.3 million was redeemed during April 2012. The redemption of the bonds resulted in a charge of \$15.1 million for the call premium and the write off of unamortized financing costs and premiums. The charge is included as a component of interest expense in the unaudited condensed consolidated statement of earnings.

At July 1, 2012, \$963 million was available under the company's long-term, multi-currency committed revolving credit facilities. In addition to the long-term committed credit facilities, the company had approximately \$530 million of short-term uncommitted credit facilities available at July 1, 2012, of which \$178.8 million was outstanding and due on demand.

[Table of Contents](#)

The company has an accounts receivable securitization agreement for a term of three years. The maximum the company can borrow under the new agreement can vary between \$150 million and \$275 million depending on the seasonal accounts receivable balances of the company's North American packaging businesses. The amount of accounts receivable sold under the securitization program was \$210.0 million and \$231.0 million at July 1, 2012, and December 31, 2011, respectively.

The U.S. note agreements, bank credit agreement and accounts receivable securitization agreement contain certain restrictions relating to dividends, investments, financial ratios, guarantees and the incurrence of additional indebtedness. The company's bank credit agreement debt covenants require the company to maintain an interest coverage ratio (as defined in the credit agreement) of no less than 3.50 and a leverage ratio (as defined) of no greater than 4.00. The company was in compliance with all loan agreements and debt covenants at July 1, 2012, and December 31, 2011, and has met all debt payment obligations. Additional details about our debt and receivables sales agreements are available in Note 12 accompanying the unaudited condensed consolidated financial statements within Item 1 of this report.

Management Performance Measures

The following financial measurements are on a non-U.S. GAAP basis and should be considered in connection with the unaudited condensed consolidated financial statements within Item 1 of this report. Non-U.S. GAAP measures should not be considered in isolation and should not be considered superior to, or a substitute for, financial measures calculated in accordance with U.S. GAAP. A presentation of earnings in accordance with U.S. GAAP is available in Item 1 of this report.

Management internally uses EVA® and EVA® dollars; comparable earnings before interest and taxes (comparable EBIT); comparable earnings before interest, taxes, depreciation and amortization (comparable EBITDA); and comparable earnings to evaluate the company's operating performance. We believe this information is also useful to investors as it provides insight into the earnings and cash flow criteria management uses to make strategic decisions. EBIT, EBITDA and net earnings are typically derived directly from the company's statements of earnings; however, they may be adjusted for items that affect comparability between periods.

Based on the above definitions, our calculation of comparable EBIT is summarized below:

(\$ in millions)	Three months ended		Six months ended	
	July 1, 2012	July 3, 2011	July 1, 2012	July 3, 2011
Earnings before taxes, as reported	\$ 192.9	\$ 208.9	\$ 314.5	\$ 356.4
Interest expense	44.7	45.2	105.1	91.7

Earnings before interest and taxes (EBIT)	237.6	254.1	419.6	448.1
Business consolidation and other activities	2.8	2.9	7.2	16.4
Comparable EBIT	\$ 240.4	\$ 257.0	\$ 426.8	\$ 464.5

Our calculation of comparable net earnings is summarized below:

(\$ in millions, except per share amounts)	Three months ended		Six months ended	
	July 1, 2012	July 3, 2011	July 1, 2012	July 3, 2011
Net earnings attributable to Ball Corporation, as reported	\$ 139.5	\$ 143.1	\$ 227.8	\$ 234.4
Discontinued operations, net of tax	0.4	0.3	0.7	1.6
Business consolidation and other activities, net of tax	1.8	1.7	4.8	10.1
Debt refinancing costs, net of tax	—	—	9.2	—
Comparable Earnings	\$ 141.7	\$ 145.1	\$ 242.5	\$ 246.1
Per diluted share, as reported	\$ 0.88	\$ 0.84	\$ 1.42	\$ 1.37
Per diluted share, as adjusted	\$ 0.89	\$ 0.85	\$ 1.52	\$ 1.43

42

[Table of Contents](#)

Our calculations of comparable EBITDA, the comparable EBIT to interest ratio and the net debt to comparable EBITDA ratio for the 12 months ended July 1, 2012, are summarized below:

(\$ in millions, except ratios)	
Net earnings from continuing operations	\$ 460.0
Add interest expense	190.5
Add tax provision	166.7
Less equity in results of affiliates	(8.8)
Earnings before interest and taxes (EBIT)	808.4
Add business consolidation and other activities	21.1
Comparable EBIT	829.5
Add depreciation and amortization	288.9
Comparable EBITDA	\$ 1,118.4
Interest expense, excluding debt refinancing costs of \$15.1 million	\$ (175.4)
Total debt at July 1, 2012	\$ 3,462.7
Less cash	(123.5)
Net debt	\$ 3,339.2
Comparable EBIT/Interest	4.7x
Net debt/Comparable EBITDA	3.0x

CONTINGENCIES, INDEMNIFICATIONS AND GUARANTEES

Details about the company's contingencies, indemnifications and guarantees are available in Notes 18 and 19 accompanying the unaudited condensed consolidated financial statements included within Item 1 of this report.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the ordinary course of business, the company employs established risk management policies and procedures, which seek to reduce our exposure to fluctuations in commodity prices, interest rates, exchange currencies and prices of the company's common stock in regard to common share repurchases, although there can be no assurance that these policies and procedures will be successful. The company mitigates its exposure by spreading the risk among various counterparties, thus limiting exposure with any one party. The company also monitors the credit ratings of its suppliers, customers, lenders and counterparties on a regular basis. Further details are available in Item 7A within Ball's 2011 annual report filed on February 22, 2012, and in Note 17 accompanying the unaudited condensed consolidated financial statements included within Item 1 of this report.

Item 4. CONTROLS AND PROCEDURES

Our chief executive officer and chief financial officer participated in management's evaluation of our disclosure controls and procedures, as defined by the Securities and Exchange Commission (SEC), as of the end of the period covered by this report and concluded that our controls and procedures were effective. During the first quarter of 2012, the company implemented a new financial consolidation system, which included modifications to certain processes and related controls for the company's financial reporting, and this new consolidation system has undergone extensive review and testing. The implementation was not undertaken in response to any identified deficiency or weakness of internal controls over financial reporting. There were no other material changes to internal controls during the company's first six months of 2012 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

As permitted by SEC guidance, management has excluded the operations of Qingdao M.C. Packaging Ltd (acquired by the company in October 2011) from its assessment of internal control over financial reporting in 2011. (Additional details regarding acquisitions are available in Note 4 to the unaudited condensed consolidated financial statements within Item 1 of this report on Form 10-Q.) The controls for the 2011 acquisitions will be evaluated for inclusion in management's assessment of internal control over financial reporting by the end of 2012.

43

FORWARD-LOOKING STATEMENTS

The company has made or implied certain forward-looking statements in this report which are made as of the end of the time frame covered by this report. These forward-looking statements represent the company's goals, and results could vary materially from those expressed or implied. From time to time we also provide oral or written forward-looking statements in other materials we release to the public. As time passes, the relevance and accuracy of forward-looking statements may change. Some factors that could cause the company's actual results or outcomes to differ materially from those discussed in the forward-looking statements include, but are not limited to: fluctuation in customer and consumer growth, demand and preferences; loss of one or more major customers or changes to contracts with one or more customers; insufficient production capacity; changes in senior management; the ongoing global recession and its effects on liquidity, credit risk, asset values and the economy; overcapacity in foreign and domestic metal container industry production facilities and its impact on pricing; failure to achieve anticipated productivity improvements or production cost reductions, including those associated with capital expenditures; changes in climate and weather; fruit, vegetable and fishing yields; power and natural resource costs; difficulty in obtaining supplies and energy, such as gas, electric power and diesel fuel; availability and cost of raw materials, as well as the increases in steel, aluminum and energy costs, and the ability or inability to include or pass on to customers changes in raw material costs; changes in the pricing of the company's products and services; competition in pricing and the possible decrease in, or loss of, sales resulting therefrom; insufficient or reduced cash flow; the number and timing of the purchases of the company's common shares; the effects of restrictive legislation, including with respect to packaging, such as recycling laws; interest rates affecting our debt; labor strikes; increases and trends in various employee benefits and labor costs, including pension, medical and health care costs; rates of return projected and earned on assets and discount rates used to measure future obligations and expenses of the company's defined benefit retirement plans; antitrust, intellectual property, consumer and other litigation; maintenance and capital expenditures; goodwill impairment; changes in generally accepted accounting principles or their interpretation; the authorization, funding, availability and returns of contracts for the aerospace and technologies segment and the nature and continuation of those contracts and related services provided thereunder; delays, extensions and technical uncertainties, as well as schedules of performance associated with such segment contracts; political and economic instability, including periodic sell-off on global equity markets, sanctions and the devaluation or revaluation of certain currencies; business risks with respect to changes in currency exchange rates; terrorist activity or war that disrupts the company's production or supply; regulatory action or laws affecting the company or its customers or suppliers, or any of their respective products, including tax, environmental, health and workplace safety, including in respect of climate change, or chemicals or substances used in raw materials or in the manufacturing process, particularly publicity concerning Bisphenol-A, or BPA, a chemical used in the manufacture of epoxy coatings applied to many types of containers (including certain of those produced by the company); technological developments and innovations; successful or unsuccessful acquisitions, joint ventures or divestitures and the integration activities associated therewith; changes to unaudited results due to statutory audits of our financial statements or management's evaluation of the company's internal control over financial reporting; ongoing uncertainties surrounding sovereign debt of various European countries, including Greece, Portugal, Spain and Italy, as well as ratings agency downgrades of various government's debt; and loss contingencies related to income and other tax matters, including those arising from audits performed by national and local tax authorities. If the company is unable to achieve its goals, then the company's actual performance could vary materially from those goals expressed or implied in the forward-looking statements. The company currently does not intend to publicly update forward-looking statements except as it deems necessary in quarterly or annual earnings reports. You are advised, however, to consult any further disclosures we make on related subjects in our 10-K, 10-Q and 8-K reports to the SEC.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

There were no events required to be reported under Item 1 for the quarter ended July 1, 2012, except as discussed in Note 18 to the unaudited condensed consolidated financial statements within Part I, Item 1 within this report.

Item 1A. Risk Factors

Risk factors affecting the company can be found within Item 1A of the company's annual report on Form 10-K.

Item 2. Changes in Securities

The following table summarizes the company's repurchases of its common stock during the quarter ended July 1, 2012.

(\$ in millions)	Purchases of Securities			
	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (a)	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs (b)
April 2 to April 29, 2012	—	\$ —	—	24,882,050
April 30 to May 27, 2012	860,000	40.08	860,000	24,022,050
May 28 to July 1, 2012	1,319,039	40.63	1,319,039	22,703,011
Total	<u>2,179,039</u>	40.42	<u>2,179,039</u>	

(a) Includes open market purchases (on a trade-date basis), share repurchase agreements and/or shares retained by the company to settle employee withholding tax liabilities.

(b) The company has an ongoing repurchase program for which shares are authorized from time to time by Ball's board of directors. On January 25, 2012, the Board authorized the repurchase by the company of up to a total of 30 million shares. This repurchase authorization also replaced all previous authorizations.

Item 3. Defaults Upon Senior Securities

There were no events required to be reported under Item 3 for the quarter ended July 1, 2012.

Item 4. (Reserved)

Item 5. Other Information

There were no events required to be reported under Item 5 for the quarter ended July 1, 2012.

Senior Vice President and Chief Financial Officer

Date: August 3, 2012

Ball Corporation and Subsidiaries
QUARTERLY REPORT ON FORM 10-Q
July 1, 2012

EXHIBIT INDEX

<u>Description</u>	<u>Exhibit</u>
Certification pursuant to Rule 13a-14(a) or Rule 15d-14(a) by John A. Hayes, President and Chief Executive Officer of Ball Corporation (Filed herewith.)	EX-31.1
Certification pursuant to Rule 13a-14(a) or Rule 15d-14(a) by Scott C. Morrison, Senior Vice President and Chief Financial Officer of Ball Corporation (Filed herewith.)	EX-31.2
Certification pursuant to Rule 13a-14(b) or Rule 15d-14(b) and Section 1350 of Chapter 63 of Title 18 of the United States Code by John A. Hayes, President and Chief Executive Officer of Ball Corporation (Furnished herewith.)	EX-32.1
Certification pursuant to Rule 13a-14(b) or Rule 15d-14(b) and Section 1350 of Chapter 63 of Title 18 of the United States Code by Scott C. Morrison, Senior Vice President and Chief Financial Officer of Ball Corporation (Furnished herewith.)	EX-32.2
Safe Harbor Statement Under the Private Securities Litigation Reform Act of 1995, as amended (Filed herewith.)	EX-99
The following materials from the company's quarterly report on Form 10-Q for the quarter ended July 1, 2012, formatted in XBRL (Extensible Business Reporting Language): (i) the Unaudited Condensed Consolidated Statement of Earnings, (ii) the Unaudited Condensed Consolidated Balance Sheet, (iii) the Unaudited Condensed Consolidated Statement of Cash Flows, and (iv) Notes to Unaudited Condensed Consolidated Financial Statements (Furnished herewith.)	EX-101

Certification

I, John A. Hayes, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Ball Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**Certification of Chief Executive Officer
Pursuant to 18 U.S.C. Section 1350
and Rule 13a-14(b) or Rule 15d-14(b)**

My name is John A. Hayes and I am the President and Chief Executive Officer of Ball Corporation (the “Company”).

I hereby certify pursuant to 18 U.S.C. Section 1350 as adopted by Section 906 of the Sarbanes—Oxley Act of 2002 that to the best of my knowledge and belief:

- (1) the quarterly report on Form 10-Q for the quarter ended July 1, 2012, filed with the U.S. Securities and Exchange Commission on August 3, 2012 (“Report”), fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934 as amended; and
- (2) the information contained in the Report fairly presents, in all material respects, the financial condition and results of the operations of Ball Corporation as of, and for, the periods presented in the Report.

/s/ John A. Hayes

John A. Hayes
President and Chief Executive Officer
Ball Corporation

Date: August 3, 2012

This certification, which accompanies the Form 10-Q to which it relates, is not deemed filed with the Securities and Exchange Commission and is not to be incorporated by reference into any filing of the Company under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended (whether made before or after the date of the Form 10-Q), irrespective of any general incorporation language contained in such filing.

A signed original of this written statement required by Section 906, or other document authenticating, acknowledging, or otherwise adopting the signature that appears in typed form within the electronic version of this written statement required by Section 906, has been provided to the Company and will be retained by the Company and furnished to the Securities and Exchange Commission or its staff upon request.

**Certification of Chief Financial Officer
Pursuant to 18 U.S.C. Section 1350
and Rule 13a-14(b) or Rule 15d-14(b)**

My name is Scott C. Morrison and I am the Senior Vice President and Chief Financial Officer of Ball Corporation (the "Company").

I hereby certify pursuant to 18 U.S.C. Section 1350 as adopted by Section 906 of the Sarbanes—Oxley Act of 2002 that to the best of my knowledge and belief:

- (1) the quarterly report on Form 10-Q for the quarter ended July 1, 2012, filed with the U.S. Securities and Exchange Commission on August 3, 2012 ("Report"), fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934 as amended; and
- (2) the information contained in the Report fairly presents, in all material respects, the financial condition and results of the operations of Ball Corporation as of, and for, the periods presented in the Report.

/s/ Scott C. Morrison

Ball Corporation

Date: August 3, 2012

This certification, which accompanies the Form 10-Q to which it relates, is not deemed filed with the Securities and Exchange Commission and is not to be incorporated by reference into any filing of the Company under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended (whether made before or after the date of the Form 10-Q), irrespective of any general incorporation language contained in such filing.

A signed original of this written statement required by Section 906, or other document authenticating, acknowledging, or otherwise adopting the signature that appears in typed form within the electronic version of this written statement required by Section 906, has been provided to the Company and will be retained by the Company and furnished to the Securities and Exchange Commission or its staff upon request.

**SAFE HARBOR STATEMENT UNDER THE PRIVATE SECURITIES
LITIGATION REFORM ACT OF 1995**

In connection with the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 (the Reform Act), Ball is hereby filing cautionary statements identifying important factors that could cause Ball's actual results to differ materially from those projected in forward-looking statements of Ball. Forward-looking statements may be made in several different contexts; for example, in the quarterly and annual earnings news releases, the quarterly earnings conference calls hosted by the company, public presentations at investor and credit conferences, the company's Annual Report and in annual and periodic communications with investors. The Form 10-Q may contain forward-looking statements. As time passes, the relevance and accuracy of forward-looking statements may change. You are advised to consult any further disclosures Ball makes on related subjects in our 10-K, 10-Q and 8-K reports to the Securities and Exchange Commission. The Reform Act defines forward-looking statements as statements that express or imply an expectation or belief and contain a projection, plan or assumption with regard to, among other things, future revenues, income, earnings per share, cash flow or capital structure. Such statements of future events or performance involve estimates, assumptions and uncertainties, and are qualified in their entirety by reference to, and are accompanied by, the following important factors that could cause Ball's actual results to differ materially from those contained in forward-looking statements made by or on behalf of Ball.

Some important factors that could cause Ball's actual results or outcomes to differ materially from those expressed or implied and discussed in forward-looking statements include, but are not limited to:

- Fluctuation in customer and consumer growth, demand and preferences, particularly during the months when the demand for metal beverage beer and soft drink cans is heaviest; loss of one or more major customers or suppliers or changes to contracts with one or more customers or suppliers; manufacturing overcapacity or under capacity; failure to achieve anticipated productivity improvements or production cost reductions including those associated with capital expenditures; changes in climate and weather; fruit, vegetable and fishing yields; interest rates affecting our debt; labor strikes and work stoppages; antitrust, intellectual property, consumer and other litigation; level of maintenance and capital expenditures; capital availability; economic conditions; and acts of war, terrorism or catastrophic events.
- Competition in pricing and the possible decrease in, or loss of, sales resulting therefrom.
- The timing and extent of regulation or deregulation; competition in each line of business; product development and introductions; and technology changes.
- Ball's ability or inability to have available sufficient production capacity in a timely manner.
- Overcapacity in metal container industry production facilities and its impact on costs, pricing and financial results.
- Regulatory action or federal, state, local or foreign laws, including mandatory deposit or restrictive packaging legislation such as recycling laws.
- Regulatory action or laws including tax, environmental, health and workplace safety, including in respect of climate change, or chemicals or substances used in raw materials or in the manufacturing process, particularly publicity concerning Bisphenol-A, or BPA, a chemical used in the manufacture of epoxy coatings applied to many types of containers (including certain of those products produced by the company).
- Regulations and standards, including changes in generally accepted accounting principles or their interpretation.
- Loss contingencies related to income and other tax matters, including those arising from audits performed by national and local tax authorities.

1

-
- The availability and cost of raw materials, supplies, power and natural resources needed for the production of metal containers as well as aerospace products.
 - Changes in senior management; increases and trends in various employee benefits and labor costs, including pension, medical and health care costs incurred in the countries in which Ball has operations; rates of return projected and earned on assets and discount rates used to measure future obligations and expenses of the company's defined retirement plans; and changes in the company's pension plans.
 - The ability or inability to pass on to customers changes in raw material cost, particularly steel and aluminum.
 - The recent global recession, and its effects on liquidity, credit risk, asset values and the economy; international business and market risks (including foreign exchange rates or tax rates); political and economic instability in various markets, including the recent sell-off on global equity markets; restrictive trade practices of national governments; the imposition of duties, taxes or other government charges by national governments; exchange controls; recent uncertainties surrounding sovereign debt of various European countries, including Greece, Portugal, Spain and Italy, as well as Standard & Poor's recent ratings downgrade of United States government debt.
 - Changes in foreign exchange rates of the currencies in the countries in which the company and its joint ventures carry on business.
 - Undertaking successful and unsuccessful acquisitions, joint ventures and divestitures and the integration activities associated with acquisitions and joint ventures, including the recent disposition of our plastics business and the recent Aerocan S.A.S. acquisition.
 - The ability or inability to achieve technological and product extensions or new technological and product advances in the company's businesses.
 - Delays, extensions and technical uncertainties, as well as schedules of performance associated with contracts for aerospace products and services, and the success or lack of success of satellite launches and the businesses and governments associated with aerospace products, services and launches.
 - The authorization, funding and availability and returns of government contracts and the nature and continuation of those contracts and related services provided thereunder, as well as the delay, cancellation or termination of contracts for the United States government, other customers or other government contractors.
 - Actual versus estimated business consolidation and investment exit costs and the estimated net realizable values of assets associated with such activities; and goodwill impairment.
 - Changes to unaudited results due to statutory audits of our financial statements or management's evaluation of the company's internal controls over financial reporting.
