**UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
WASHINGTON, DC 20549**

**FORM 10-Q**

**x QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended March 31, 2016

Commission file number 001-07349

**BALL CORPORATION**

**State of Indiana**  
(State or other jurisdiction of incorporation or organization)

**35-0160610**  
(I.R.S. Employer Identification No.)

**10 Longs Peak Drive, P.O. Box 5000**  
**Broomfield, CO 80021-2510**  
(Address of registrant's principal executive office)

**80021-2510**  
(Zip Code)

Registrant's telephone number, including area code: **303/469-3131**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes x No o

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes x No o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer x Accelerated filer o  
Non-accelerated filer o Smaller reporting company o

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes o No x

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Outstanding at April 22, 2016
Common Stock, without par value	141,732,649 shares

**Ball Corporation**  
**Notes to the Unaudited Condensed Consolidated Financial Statements**

**1. Basis of Presentation**

The accompanying unaudited condensed consolidated financial statements include the accounts of Ball Corporation and its controlled affiliates, including its consolidated variable interest entities (collectively Ball, the company, we or our), and have been prepared by the company. Certain information and footnote disclosures, including critical and significant accounting policies normally included in financial statements prepared in accordance with generally accepted accounting principles, have been condensed or omitted for this quarterly presentation.

Results of operations for the periods shown are not necessarily indicative of results for the year, particularly in view of the seasonality in the packaging segments and the irregularity of contract revenues in the aerospace and technologies segment. These unaudited condensed consolidated financial statements and accompanying notes should be read in conjunction with the consolidated financial statements and the notes thereto included in the company's Annual Report on Form 10-K filed on February 16, 2016, pursuant to Section 13 of the Securities Exchange Act of 1934 for the fiscal year ended December 31, 2015 (annual report).

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP) requires Ball's management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting periods. These estimates are based on historical experience and various assumptions believed to be reasonable under the circumstances. Ball's management evaluates these estimates on an ongoing basis and adjusts or revises the estimates as circumstances change. As future events and their impacts cannot be determined with precision, actual results may differ from these estimates. In the opinion of management, the financial statements reflect all adjustments necessary to fairly state the results of the periods presented.

Certain prior period amounts have been reclassified in order to conform to the current period presentation.

**2. Accounting Pronouncements**

*Recently Adopted Accounting Standards*

In November 2015, accounting guidance was issued that requires classification of all deferred tax assets and liabilities, along with any related valuation allowances, as noncurrent on the balance sheet. As a result, each tax jurisdiction will now only have one net noncurrent deferred tax asset or liability. The guidance, however, does not change the existing requirement that only permits offsetting within a tax jurisdiction; therefore, companies are still prohibited from offsetting deferred tax liabilities from one jurisdiction against deferred tax assets of another tax jurisdiction. The guidance was applied prospectively on January 1, 2016. Prior period information was not adjusted.

In September 2015, amendments to existing accounting guidance were issued to simplify the accounting for adjustments made to provisional amounts recognized in business combinations. Under the previous guidance, companies were required to retrospectively revise comparative financial statements for changes made to provisional amounts. The amended guidance eliminates the requirement to retrospectively account for these adjustments. The guidance was applied prospectively to adjustments to provisional amounts that occurred on or after January 1, 2016. The guidance did not have a material effect on the company's unaudited condensed consolidated financial statements.

In July 2015, amendments to existing accounting guidance were issued to modify the subsequent measurement of inventory. Under previous guidance, a company measured inventory at the lower of cost or market, with market defined as replacement cost, net realizable value, or net realizable value less a normal profit margin. Current replacement cost could be used provided that it was not above the net realizable value (ceiling) or below net realizable value less a normal profit margin (floor). The new guidance requires a company to subsequently measure inventory at the lower of cost or net realizable value and eliminates the need to determine replacement cost and evaluate whether it is above the ceiling or below the floor. Net realizable value is defined as the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation. The guidance was applied prospectively on January 1, 2016, and did not have a material effect on the company's unaudited condensed consolidated financial statements.

[Table of Contents](#)

**Ball Corporation**  
**Notes to the Unaudited Condensed Consolidated Financial Statements**

**2. Accounting Pronouncements (continued)**

In May 2015, amendments to the existing accounting guidance were issued to remove the requirement to categorize net asset value per share, currently utilized as a practical expedient, by investment within the fair value hierarchy based on redeemable dates. This amendment also removes the requirement to make certain disclosures for all

investments that are eligible to be measured at fair value using the net asset value per share expedient. The guidance was applied prospectively on January 1, 2016, and did not have a material effect on the company's unaudited condensed consolidated financial statements.

In April 2015, amendments to existing accounting guidance were issued to provide explicit guidance related to a customer's accounting for fees paid in a cloud computing arrangement. Under the guidance, cloud computing arrangements that include a software license are to be accounted for consistent with the acquisition of other software licenses. Conversely, cloud computing arrangements that do not include a software license are to be accounted for as a service contract or other applicable accounting guidance. This guidance was applied prospectively on January 1, 2016, and did not have a material effect on the company's unaudited condensed consolidated financial statements.

In April 2015, accounting guidance was issued to change the balance sheet presentation for debt issuance costs. Under the new guidance, debt issuance costs are presented as a direct deduction from the long-term debt, consistent with debt discounts, rather than as a deferred charge. The guidance does not affect the recognition and measurement of debt issuance costs; hence, amortization of debt issuance will continue to be reported as interest expense. This guidance was applied retrospectively on January 1, 2016, and resulted in decreases of intangibles and other long-term assets and long-term debt by \$80 million from the amounts previously reported as of December 31, 2015.

In February 2015, amendments to existing accounting guidance were issued that modify the analysis companies must perform in order to determine whether a legal entity should be consolidated. The new guidance includes modifications related to: 1) limited partnerships and similar legal entities, 2) evaluating fees paid to a decision maker or service provider as a variable interest, 3) the effect of fee arrangements on the primary beneficiary, 4) the effect of related parties on the primary beneficiary, and 5) certain investment funds. This guidance was applied on a modified retrospective basis on January 1, 2016, and did not have a material effect on the company's unaudited condensed consolidated financial statements.

In January 2015, accounting guidance was issued to eliminate the concept of extraordinary items. Previous guidance required extraordinary events, defined as both unusual in nature and infrequent in occurrence, to be reported as separate line items from results of ordinary operations within company financial statements. The disclosure requirements will be for items and events which are unusual in nature and/or infrequent in occurrence. Companies have the option of disclosing such items as a separate component of income from continuing operations or disclosing unusual and/or infrequent events in the notes to the financial statements. The guidance was applied prospectively on January 1, 2016, and did not have a material effect on the company's unaudited condensed consolidated financial statements.

#### *New Accounting Guidance*

In April 2016, amendments to clarify the guidance on accounting for licenses of intellectual property (IP) and identifying performance obligations in the new revenue standard were finalized. The amendments clarify how an entity evaluates the nature of its promise in granting a license of IP, which will determine whether revenue should be recognized over time or at a point in time. The amendments also clarify when a promised good or service is separately identifiable and allows entities to disregard items that are immaterial in the context of a contract and allow entities the election to account for shipping and handling activities as a fulfillment cost rather than an additional promised service. The amendments have the same effective date and transition requirements as the new revenue standard, which is effective for Ball on January 1, 2018. The company is currently assessing the impact that the adoption of this new guidance will have on its consolidated financial statements.

In March 2016, accounting guidance was issued on the effect of derivative contract novations on existing hedge accounting relationships. The amendments clarify that a change in the counterparty to a derivative instrument designated as a hedging instrument does not in and of itself require dedesignation of that hedging relationship, provided that all other hedge accounting criteria continue to be met. The guidance will be applied prospectively on January 1, 2017, and is not expected to have a material effect on the company's consolidated financial statements.

---

#### [Table of Contents](#)

### **Ball Corporation Notes to the Unaudited Condensed Consolidated Financial Statements**

#### **2. Accounting Pronouncements (continued)**

In March 2016, final accounting guidance was issued clarifying that the assessment of whether an embedded contingent put or call option is clearly and closely related to the debt host only requires an analysis of the four-step decision sequence outlined in the accounting standards codification. Consequently, when a contingent put or call option embedded in a debt instrument would be evaluated for possible separate accounting as a derivative instrument, the nature of the exercise contingency would be disregarded. Companies will still need to evaluate other relevant embedded derivative guidance. The guidance will be applied on a modified retrospective basis on January 1, 2017, and is not expected to have a material effect on the company's consolidated financial statements.

In March 2016, final accounting guidance was issued eliminating the requirement to retrospectively apply the equity method in previous periods when an investor initially obtains significant influence over an investee. The new guidance requires the investor to apply the equity method prospectively from the date the investment qualifies for the equity method. The investor will add the carrying value of the existing investment to the cost of the additional investment to determine the initial cost basis of the equity method investment. This guidance will be applied prospectively on January 1, 2017, and is not expected to have a material effect on the company's consolidated financial statements.

In March 2016, the principal versus agent guidance within the new revenue standard was amended to clarify how an entity should identify the unit of accounting for the principal versus agent evaluation. The new standard requires an entity to determine whether it is a principal or an agent in a transaction in which another party is involved in providing goods or services to a customer, by evaluating the nature of its promise to the customer. An entity is a principal and records revenue on a gross basis if it controls the promised good or service before transferring the good or service to the customer. An entity is an agent and records as revenue the net amount it retains for its agency services if its role is to arrange for another entity to provide the goods or services. The amendments have the same effective date and transition requirements as the new revenue standard, which is effective for Ball on January 1, 2018. The company is currently assessing the impact that the adoption of this new guidance will have on its consolidated financial statements.

In March 2016, amendments to existing accounting guidance were issued to simplify various aspects related to how share-based payments are accounted for and presented in the consolidated financial statements. All excess tax benefits and tax deficiencies should be recognized as income tax provision (benefit) in the income statement. This change is required to be applied prospectively resulting from settlements after the date of adoption of the guidance. The tax benefit will be recorded when it arises, subject to normal valuation considerations. This change is required to be applied on a modified retrospective basis, with a cumulative effect adjustment to opening retained earnings. All tax related cash flows resulting from share-based payments are to be reported as operating activities on the statement of cash flows with either a prospective or retrospective approach. Other modifications to the guidance include modifications related to minimum statutory tax withholding requirements and accounting policy election for the impact of forfeitures of shared-based payment awards. The guidance will be effective on January 1, 2017. The company is currently assessing the impact that the adoption of this standard will have on its consolidated financial statements.

In February 2016, lease accounting guidance was issued which, for operating leases, requires a lessee to recognize a right-of-use asset and a lease liability, initially measured at the present value of the lease payments, in its balance sheet. The guidance also requires a lessee to recognize a single lease cost, calculated so that the cost of the lease is

allocated over the lease term, generally on a straight-line basis. The guidance will be effective for Ball on January 1, 2019. The company is currently assessing the impact the adoption of this standard will have on its consolidated financial statements.

In January 2016, accounting guidance was issued on the classification and measurement of financial assets and liabilities (equity securities and financial liabilities) under the fair value option and the presentation and disclosure requirements for financial instruments. The guidance modifies how entities measure equity investments and present changes in the fair value of financial liabilities. Under the new guidance, entities will need to measure equity investments that do not result in consolidation and are not accounted under the equity method at fair value and recognize any changes in fair value in net earnings. An exception will apply to those equity investments that do not have a readily determinable fair value and do not qualify for the practical expedient to estimate fair value under the guidance and, as such, these investments may be measured at cost. The guidance will be effective on January 1, 2018. The company is currently assessing the impact that the adoption of this new guidance will have on its consolidated financial statements.

[Table of Contents](#)

**Ball Corporation**  
**Notes to the Unaudited Condensed Consolidated Financial Statements**

**2. Accounting Pronouncements (continued)**

In August 2014, accounting guidance was issued to define management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures in certain circumstances. Under the new guidance, management is required to evaluate, at each annual and interim reporting period, whether there are conditions or events that raise substantial doubt about the entity's ability to continue as a going concern within one year after the date the financial statements are issued and to provide related disclosures. The guidance will be effective on January 1, 2017, and is not expected to have a material effect on the company's consolidated financial statements.

In May 2014, the Financial Accounting Standards Board (FASB) and International Accounting Standards Board jointly issued new revenue recognition guidance which outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. The new guidance contains a more robust framework for addressing revenue issues and is intended to remove inconsistencies in existing guidance and improve comparability of revenue recognition practices across entities, industries, jurisdictions and capital markets. The guidance will supersede the majority of current revenue recognition guidance, including industry-specific guidance. In July 2015, the FASB approved the deferral of the effective date of the new revenue recognition guidance by one year. The guidance will be effective for Ball on January 1, 2018, and early adoption is permitted. However, entities are not permitted to adopt the standard earlier than the original effective date of January 1, 2017. Entities have the option of using either a full retrospective or modified retrospective approach for the adoption of the standard. The company is currently assessing the impact that the adoption of this standard will have on its consolidated financial statements.

**3. Business Segment Information**

Ball's operations are organized and reviewed by management along its product lines and geographical areas and presented in the four reportable segments discussed below.

*Metal beverage packaging, Americas and Asia:* Consists of the metal beverage packaging, Americas, operations in the U.S., Canada, Mexico and Brazil, and the metal beverage packaging, Asia, operations in the People's Republic of China (PRC). The Americas and Asia segments have been aggregated based on similar economic and qualitative characteristics. The operations in this reporting segment manufacture and sell metal beverage containers.

*Metal beverage packaging, Europe:* Consists of operations in several countries in Europe that manufacture and sell metal beverage containers.

*Metal food and household products packaging:* Consists of operations in the U.S., Europe, Canada, Mexico, Argentina and India that manufacture and sell steel food, aerosol, paint, general line and decorative specialty containers, as well as extruded aluminum beverage and aerosol containers and aluminum slugs.

*Aerospace and technologies:* Consists of the manufacture and sale of aerospace and other related products and the providing of services used in the defense, civil space and commercial space industries.

The accounting policies of the segments are the same as those in the unaudited condensed consolidated financial statements. A discussion of the company's critical and significant accounting policies can be found in Ball's annual report. The company also has investments in companies in the U.S. and Vietnam, which are accounted for under the equity method of accounting and, accordingly, those results are not included in segment sales or earnings.

**4. Acquisitions**
**Rexam PLC (Rexam)**

On February 19, 2015, the company and Rexam PLC (Rexam) announced the terms of a recommended offer by the company to acquire all of the outstanding shares of Rexam in a cash and stock transaction. Under the terms of the offer, for each Rexam share, Rexam shareholders will receive 407 pence in cash and 0.04568 shares of the company. The transaction valued Rexam at 610 pence per share based on the company's 90-day volume weighted average stock price as of February 17, 2015, and an exchange rate of U.S. \$1.54: £1 on that date representing an equity value of £4.3 billion (\$6.6 billion). The actual value of the transaction will be determined based on the exchange rate and the company's stock price at the time of the closing of the transaction. As described below, the company has entered into collar, option and swap contracts to partially mitigate its currency exchange risk with regard to the cash component of the purchase price.

By way of compensation for any loss suffered by Rexam in connection with the preparation and negotiation of the offer, the co-operation agreement and any other document relating to the acquisition, Ball has undertaken in the co-operation agreement that, on the occurrence of a break payment event Ball will pay, or procure the payment to Rexam of an amount in cash in British pounds. As discussed below, Ball's shareholders approved the issuance of Ball common stock to shareholders of Rexam as partial consideration for the proposed acquisition. As a result, the amount of the break payment would be £302 million upon the occurrence of a break payment event.

A special meeting of Ball's shareholders was held on July 28, 2015, at which our shareholders approved the issuance of Ball common stock to shareholders of Rexam as partial consideration for the proposed acquisition. The board of directors of both Ball and Rexam unanimously support the transaction, and the consummation of the transaction remains subject to, among other things, approval from Rexam's shareholders, certain regulatory approvals and satisfaction of other customary closing conditions. Ball expects that obtaining final regulatory approval by the European Commission (EC), Brazil's Council for Economic Defence (CADE) and the U.S. Federal Trade Commission (FTC) will ultimately require Ball to divest certain assets. Subject to receipt of such approvals and the satisfaction of all such conditions, Ball currently expects to complete the Rexam acquisition and related divestitures in late June 2016; however, there can be no assurances that the Rexam acquisition or the related divestitures will be completed by such time, or on the terms described herein, or at all. To date, the EC and CADE have provided conditional clearance of the proposed acquisition, subject to their approval of the proposed buyer of the divested assets, terms of the divestiture sale and other customary regulatory processes.

In late 2015, Ball completed the acquisition of the remaining outstanding noncontrolling interests in a Ball-controlled joint venture company (Latapack-Ball) organized and operating in Brazil. During October and November 2015, Ball and its joint venture partners reached an agreement for the partners to exchange all of their interest in Latapack-Ball for a total of approximately 5.7 million treasury shares of Ball common stock and \$17.4 million of cash. The acquisition of the noncontrolling interests in the joint venture was completed in December 2015, and Latapack-Ball is now a wholly owned subsidiary of Ball.

**Ball Corporation**  
**Notes to the Unaudited Condensed Consolidated Financial Statements**

**4. Acquisitions (continued)**

*Long-term Debt*

On February 19, 2015, the company entered into a £3.3 billion unsecured, committed bridge loan agreement (the Bridge Facility), pursuant to which lending institutions agreed, subject to limited conditions, to provide the financing necessary to pay the cash portion of the consideration payable to Rexam's shareholders upon consummation of the announced, proposed acquisition of Rexam along with related fees and expenses. In December 2015, the company issued senior notes totaling \$1 billion, €400 million and €700 million due 2020, 2020, and 2023, respectively, with rates of 4.375 percent, 3.5 percent and 4.375 percent, respectively. Pursuant to the terms of the Bridge Facility, the company deposited the net proceeds from the issuance of such notes into escrow accounts, recorded as restricted cash (from which proceeds would be released, subject to certain conditions, to pay a portion of the cash consideration payable to Rexam shareholders and related fees and expenses), which reduced the commitments under the Bridge Facility to £1.9 billion. If the Rexam acquisition is not consummated on or prior to November 15, 2016, we will be required to redeem all of the outstanding notes from the December 2015 senior note issuances at the redemption price applicable to each series. This would result in the use of restricted cash and other available funds to redeem these senior notes and pay any additional fees. However, the senior note offerings are not conditioned upon the Rexam acquisition. See Note 11 for further details related to these transactions.

On February 19, 2015, the company entered into a \$3 billion revolving credit facility (the 2018 Revolver) to replace its then existing approximate \$1 billion revolving credit facility, repay its \$93 million Term C loan, repay the outstanding balance on the existing revolving credit facility, redeem the 2020 and 2021 senior notes and provide ongoing liquidity for the company. In June 2015, during a subsequent debt offering, the company issued \$1 billion of 5.25 percent senior notes, thereby reducing the borrowing capacity under the revolving credit facility from \$3 billion to \$2.25 billion. In March 2016, the 2018 Revolver was refinanced in full with a \$1.5 billion multi-currency revolving credit facility. See Note 11 for further details related to these transactions.

On March 18, 2016, Ball refinanced the Bridge Facility in full with a \$1.4 billion Term A loan facility available to Ball and a €1.1 billion Term A loan facility available to a subsidiary of Ball, and refinanced the 2018 Revolver in full with a \$1.5 billion multi-currency revolving credit facility available to Ball and certain of its subsidiaries (the 2021 Revolver), in each case under a stock secured, five-year credit agreement, pursuant to which the term lenders thereunder agreed, subject to limited conditions, to provide financing necessary to pay the cash portion of the consideration payable to Rexam's shareholders upon consummation of the Rexam acquisition and related fees and expenses, and the revolving lenders thereunder agreed, subject to certain conditions, to make the 2021 Revolver available for general corporate and other specified purposes. See Note 11 for further details related to these transactions.

*Currency Exchange Rate and Interest Rate Risks*

The company entered into collar and option contracts to partially mitigate its currency exchange rate risk associated with the British pound denominated cash portion of the purchase price from February 19, 2015, through the expected closing date of the announced, proposed acquisition of Rexam, with an aggregate notional amount of approximately £1.6 billion (\$2.3 billion) at March 31, 2016. In connection with the December 2015 issuance of \$1 billion U.S. dollar senior notes due 2020, the company executed cross-currency swaps to convert this fixed-rate U.S. dollar debt to fixed-rate euro debt for the life of the notes to more effectively match the future cash flows of the company. At March 31, 2016, the cross-currency swaps had a notional amount of \$1 billion. These contracts were not designated as hedges, and therefore, changes in the fair value of these contracts are recorded in the unaudited condensed consolidated statements of earnings in business consolidation and other activities.

---

[Table of Contents](#)

**Ball Corporation**  
**Notes to the Unaudited Condensed Consolidated Financial Statements**

**4. Acquisitions (continued)**

The company entered into interest rate swaps to hedge against rising U.S. and European interest rates to minimize its interest rate exposure associated with anticipated debt issuances in connection with the proposed Rexam acquisition. At March 31, 2016, the company had outstanding U.S. and European interest rate swaps with notional amounts totaling approximately \$200 million and €900 million, respectively. In addition, the company entered into interest rate option contracts to hedge negative Euribor rates with an aggregate notional amount of €750 million. In the first quarter of 2016, the company terminated interest rate swap contracts with an aggregate notional amount of \$923 million (€850 million). None of these contracts have been designated as hedges; therefore, changes in the fair value of these interest rate swap and option contracts are recorded in the unaudited condensed consolidated statements of earnings in debt refinancing and other costs, a component of total interest expense.

For further details related to the aforementioned currency exchange rate and interest rate risks, and the valuation of these derivatives, see Notes 5 and 16.

**Wavefront Technologies (Wavefront)**

In January 2016, the company acquired Wavefront located in Annapolis Junction, Maryland, for a total cash consideration of \$36 million, net of cash acquired. Wavefront provides systems and network engineering, software development software and analytical services for cyber and mission-focused programs to the U.S. government and commercial industry. The financial results of Wavefront have been included in our aerospace and technologies segment from the date of acquisition. The acquisition is not material to the company.

**Sonoco Products Company (Sonoco)**

In February 2015, the company acquired Sonoco's metal end and closure manufacturing facilities in Canton, Ohio, and entered into a long-term supply agreement with Sonoco in exchange for total cash of \$29 million paid at closing, \$11 million of contingent cash consideration and \$24 million of contingent noncash consideration.

The facilities manufacture multiple-sized closures for the metal food container market, including high quality steel and aluminum easy-open ends. The financial results of Sonoco have been included in our metal food and household products packaging segment from the date of acquisition. The acquisition is not material to the company.

## 5. Business Consolidation and Other Activities

Following is a summary of business consolidation and other activity (charges)/income included in the unaudited condensed consolidated statements of earnings:

(\$ in millions)	Three Months Ended March 31,	
	2016	2015
Metal beverage packaging, Americas & Asia	\$ (4)	\$ (2)
Metal beverage packaging, Europe	(4)	(2)
Metal food & household products packaging	(14)	—
Aerospace & technologies	—	1
Corporate and other	(245)	(49)
	<u>\$ (267)</u>	<u>\$ (52)</u>

## [Table of Contents](#)

### Ball Corporation Notes to the Unaudited Condensed Consolidated Financial Statements

#### 5. Business Consolidation and Other Activities (continued)

##### 2016

###### *Metal Beverage Packaging, Americas and Asia*

During the first quarter, the company recorded charges of \$4 million related to business reorganization activities in the company's metal beverage packaging, Asia, operations, and for ongoing costs related to previously closed facilities.

###### *Metal Beverage Packaging, Europe*

During the first quarter, the company recorded charges of \$4 million for professional services and other costs associated with the proposed acquisition of Rexam.

###### *Metal Food and Household Products Packaging*

During the first quarter of 2016, the company announced the closure of the Weirton, West Virginia, plant, a food and household packaging flat sheet production and end-making facility, which will cease production in early 2017. Charges in the first quarter of 2016 of \$9 million were comprised of employee severance and benefits, facility shutdown costs, and asset impairment and disposal costs.

Other charges in the quarter included \$5 million of insignificant activities.

###### *Corporate*

During the first quarter, the company recorded charges of \$24 million for professional services and other costs associated with the proposed acquisition of Rexam. In addition, the company recognized losses of \$88 million associated with its collar, swap and option contracts entered into to reduce its exposure to currency exchange rate changes in connection with the British pound denominated cash portion of the purchase price for the announced, proposed acquisition of Rexam, further discussed in Note 16.

During the first quarter, the company recorded charges of \$96 million for foreign currency losses from the revaluation of foreign currency denominated restricted cash and intercompany loans related to the cash component of the proposed Rexam acquisition purchase price and the revaluation of the euro-denominated debt issuance in December 2015. The company also recognized a \$36 million unrealized loss on the fair value of cross-currency swaps entered into in connection with the December 2015 issuance of the \$1 billion senior notes due 2020. See Note 16 for additional information.

Other charges in the quarter included \$1 million for insignificant activities.

##### 2015

###### *Metal Beverage Packaging, Americas and Asia*

During the first quarter, the company recorded charges of \$2 million related to business reorganization activities in the company's metal beverage packaging, Asia, operations, and for ongoing costs related to previously closed facilities.

## [Table of Contents](#)

### Ball Corporation Notes to the Unaudited Condensed Consolidated Financial Statements

#### 5. Business Consolidation and Other Activities (continued)

###### *Metal Beverage Packaging, Europe*

During the first quarter, the company recorded charges of \$1 million related to headcount reductions, cost-out initiatives and the relocation of the company's European headquarters from Germany to Switzerland, as well as additional tax expense of \$2 million related to this relocation. The quarter also included charges of \$1 million for business reorganization activities.

*Metal Food and Household Products Packaging, and Aerospace and Technologies*

The company recorded a net gain of \$1 million for insignificant activities.

*Corporate*

During the first quarter, the company recorded charges of \$20 million for professional services and other costs associated with the proposed acquisition of Rexam. In addition, the company recognized losses of \$28 million associated with its collar and option contracts entered into to reduce its exposure to currency exchange rate changes in connection with the British pound denominated cash portion of the announced, proposed acquisition of Rexam, further discussed in Note 16. Other charges in the quarter included \$1 million for insignificant activities.

**6. Receivables**

(\$ in millions)	March 31, 2016	December 31, 2015
Trade accounts receivable	\$ 913	\$ 759
Less allowance for doubtful accounts	(5)	(5)
Net trade accounts receivable	908	754
Other receivables	114	131
	<u>\$ 1,022</u>	<u>\$ 885</u>

The company has entered into several regional committed and uncommitted accounts receivable factoring programs with various financial institutions for certain receivables of the company. The programs are accounted for as true sales of the receivables, without recourse to Ball, and had combined limits of approximately \$593 million at March 31, 2016. A total of \$442 million and \$479 million were sold under these programs as of March 31, 2016, and December 31, 2015, respectively.

**7. Inventories**

(\$ in millions)	March 31, 2016	December 31, 2015
Raw materials and supplies	\$ 402	\$ 438
Work-in-process and finished goods	599	504
Less inventory reserves	(45)	(44)
	<u>\$ 956</u>	<u>\$ 898</u>

[Table of Contents](#)

**Ball Corporation**  
**Notes to the Unaudited Condensed Consolidated Financial Statements**

**8. Property, Plant and Equipment**

(\$ in millions)	March 31, 2016	December 31, 2015
Land	\$ 71	\$ 70
Buildings	1,036	1,023
Machinery and equipment	4,037	3,904
Construction-in-progress	360	408
	5,504	5,405
Accumulated depreciation	(2,774)	(2,719)
	<u>\$ 2,730</u>	<u>\$ 2,686</u>

Property, plant and equipment are stated at historical or acquired cost. Depreciation expense amounted to \$65 million and \$59 million for the three months ended March 31, 2016 and 2015, respectively.

**9. Goodwill**

(\$ in millions)	Metal Beverage Packaging, Americas & Asia	Metal Beverage Packaging, Europe	Metal Food & Household Products Packaging	Aerospace & Technologies	Total
Balance at December 31, 2015	\$ 739	\$ 817	\$ 612	\$ 9	\$ 2,177
Business acquisition	—	—	—	29	29
Effects of currency exchange rates	—	39	6	—	45
Balance at March 31, 2016	<u>\$ 739</u>	<u>\$ 856</u>	<u>\$ 618</u>	<u>\$ 38</u>	<u>\$ 2,251</u>

The company's annual goodwill impairment test completed in the fourth quarter of 2015 indicated the fair value of the metal beverage packaging, Asia (Beverage Asia) reporting unit exceeded its carrying amount by approximately 25 percent. The current supply of metal beverage packaging exceeds demand in China, resulting in pricing pressure and negative impacts on the profitability of our Beverage Asia reporting unit. If it becomes an expectation that this oversupply situation will continue for an extended

period of time, the company may be required to record a noncash impairment charge for some or all of the goodwill associated with the Beverage Asia reporting unit, the total balance of which was \$78 million at March 31, 2016.

[Table of Contents](#)

**Ball Corporation**  
**Notes to the Unaudited Condensed Consolidated Financial Statements**

**10. Intangibles and Other Assets**

(\$ in millions)	March 31, 2016	December 31, 2015
Investments in affiliates	\$ 34	\$ 34
Intangible assets (net of accumulated amortization of \$139 million at March 31, 2016, and \$133 million at December 31, 2015)	117	118
Capitalized software (net of accumulated amortization of \$121 million at March 31, 2016, and \$116 million at December 31, 2015)	83	77
Company and trust-owned life insurance	145	137
Long-term deferred tax assets	204	60
Other	73	70
	<u>\$ 656</u>	<u>\$ 496</u>

Total amortization expense of intangible assets amounted to \$10 million and \$9 million for the three months ended March 31, 2016 and 2015, respectively.

**11. Debt and Interest Costs**

Long-term debt consisted of the following:

(\$ in millions)	March 31, 2016	December 31, 2015
<b>Senior Notes</b>		
5.25% due July 2025	\$ 1,000	\$ 1,000
4.375% due December 2020	1,000	1,000
4.00% due November 2023	1,000	1,000
4.375%, euro denominated, due December 2023	797	760
5.00% due March 2022	750	750
3.50%, euro denominated, due December 2020	455	435
<b>Term A Loans due March 2021 at variable rate</b>	—	—
<b>Multi-currency revolver due March 2021 at variable rate</b>	411	—
<b>Bridge Facility</b>	—	—
<b>Latapack-Ball Notes Payable</b> , denominated in various currencies (2016 - 4.64 %; 2015 - 4.35%)	152	168
<b>Other (including debt issuance costs)</b>	(104)	(85)
	<u>5,461</u>	<u>5,028</u>

	<u>\$ 5,408</u>	<u>\$ 4,974</u>

[Table of Contents](#)

**Ball Corporation**  
**Notes to the Unaudited Condensed Consolidated Financial Statements**

**11. Debt and Interest Costs (continued)**

Following is a summary of debt refinancing and other costs included in the unaudited condensed consolidated statements of earnings:

(\$ in millions)	Three Months Ended March 31,	
	2016	2015
<b>Debt Refinancing and Other Costs:</b>		
Interest expense on 3.5% and 4.375% senior notes	\$ (25)	\$ —
Economic hedge - interest rate risk	(16)	—
Refinance of bridge and revolving credit facilities	(13)	—
Amortization of unsecured, committed bridge facility financing fees	(7)	(2)
Redemption of 6.75% and 5.75% senior notes, due September 2020 and May 2021, respectively, and refinance of senior credit facilities	—	(58)
	<u>\$ (61)</u>	<u>\$ (60)</u>

At March 31, 2016, taking into account outstanding letters of credit and excluding availability under the accounts receivable securitization program, approximately \$1.1 billion was available under the company's long-term, revolving credit facility, which is available until March 2021. In addition to this facility, the company had approximately \$578 million of short-term uncommitted credit facilities available at March 31, 2016, of which \$223 million was outstanding and due on demand. At December 31, 2015, the company had \$24 million outstanding under short-term uncommitted credit facilities. Short-term debt and current portion of long-term debt on the balance sheet includes the company's borrowings under its existing accounts receivable securitization program, totaling \$115 million at March 31, 2016, and no amounts outstanding at December 31,

2015. This program, which has been amended and extended from time to time, is scheduled to mature in June 2017 and allows the company to borrow against a maximum amount of accounts receivable that varies between \$90 million and \$140 million depending on the seasonal accounts receivable balances in the company's North American packaging businesses.

The fair value of long-term debt was estimated to be \$5.7 billion at March 31, 2016, which approximated its carrying value of \$5.5 billion. The fair value was estimated to be \$5.2 billion at December 31, 2015, which approximated the carrying value of \$5.1 billion. The fair value reflects the market rates at each period end for debt with credit ratings similar to the company's ratings and is classified as Level 2 within the fair value hierarchy. Rates currently available to the company for loans with similar terms and maturities are used to estimate the fair value of long-term debt based on discounted cash flows.

The senior notes and senior credit facilities are guaranteed on a full, unconditional and joint and several basis by certain of the company's wholly owned domestic subsidiaries. Certain foreign denominated tranches of the senior credit facilities are similarly guaranteed by certain of the company's wholly owned foreign subsidiaries. Note 19 contains further details, as well as required unaudited condensed consolidating financial information for the company, segregating the guarantor subsidiaries and non-guarantor subsidiaries as defined in the senior notes agreements.

The U.S. note agreements, bank credit agreement, bridge loan agreement and accounts receivable securitization agreement contain certain restrictions relating to dividend payments, share repurchases, investments, financial ratios, guarantees and the incurrence of additional indebtedness. The most restrictive of the company's debt covenants requires the company to maintain a leverage ratio (as defined) of no greater than 4.00, prior to considering the impacts of the announced, proposed

---

[Table of Contents](#)

**Ball Corporation**  
**Notes to the Unaudited Condensed Consolidated Financial Statements**

**11. Debt and Interest Costs (continued)**

acquisition of Rexam. The company was in compliance with all loan agreements and debt covenants at March 31, 2016, and December 31, 2015, and has met all debt payment obligations. As of March 31, 2016, the amounts disclosed as available under the company's long-term multi-currency committed revolving facilities, the short-term uncommitted credit facilities and the unsecured, committed bridge loan agreement, are available without violating our existing debt covenants.

In February 2015, Ball entered into a \$3 billion 2018 Revolver to replace its then existing approximate \$1 billion revolving credit facility, repay its \$93 million Term C loan, repay the outstanding balance on the existing revolving credit facility, redeem the 2020 and 2021 senior notes and repay the existing private placement debt of Rexam upon closing of the announced, proposed acquisition of Rexam. The 2018 Revolver would have expired in February 2018 and accrued interest at LIBOR plus an applicable margin based on the net leverage ratio of the company, which varies from 1.25 percent to 1.75 percent. In June 2015, Ball issued \$1 billion of 5.25 percent senior notes due in July 2025. Ball used the net proceeds of this offering and other available cash to repay borrowings under its 2018 Revolver and reduce the borrowing capacity under the 2018 Revolver from \$3 billion to \$2.25 billion.

Also in February 2015, the company entered into a £3.3 billion Bridge Facility, pursuant to which lending institutions agreed, subject to limited conditions, to provide financing necessary to pay the cash portion of the purchase price payable to Rexam shareholders upon consummation of the proposed acquisition of Rexam and related fees and expenses. Approximately \$7 million and \$2 million are included in debt refinancing and other costs, a component of total interest expense, in the unaudited condensed consolidated statements of earnings for the three months ended March 31, 2016 and 2015, respectively, related to these fees and expenses. The interest rate for the Bridge Facility can vary, not to exceed 7.0 percent per annum. In December 2015, the availability under the Bridge Facility was reduced to £1.9 billion.

In March 2015, Ball redeemed its outstanding 6.75 percent senior notes and 5.75 percent senior notes due in September 2020 and May 2021, respectively, at a price per note of 103.375 percent and 106.096 percent, respectively, of the outstanding principal amounts, plus accrued interest. The redemptions resulted in a pre-tax charge in interest expense of \$56 million reported in the three months ended March 31, 2015, which is reported in debt refinancing and other costs, a component of total interest expense, composed of the redemption premiums and the write-offs of related debt financing costs. The company also recorded charges of \$2 million for the write-off of unamortized deferred financing costs associated with the refinancing of the revolving credit facility and repayment of the Term C loan for the three months ended March 31, 2015.

In December 2015, the company issued \$1 billion of 4.375 percent senior notes, €400 million of 3.5 percent senior notes, all due in December 2020, and €700 million of 4.375 percent senior notes, due in December 2023. The company intends to use the proceeds to pay a portion of the cash purchase price payable in the proposed Rexam acquisition. The company elected to restrict these proceeds in an escrow account, which enabled the reduction of its Bridge Facility capacity from £3.3 billion to £1.9 billion. Until the Rexam acquisition is consummated, the interest on these senior notes is being recorded in debt refinancing and other costs, and totaled \$25 million for the three months ended March 31, 2016. In the event the Rexam acquisition is not consummated on or prior to November 15, 2016, these senior notes will be callable by the lenders, requiring the company to effect the redemption of all of the outstanding notes of each series at the applicable redemption price of face value plus accrued and unpaid interest. This would result in the use of the restricted cash and available cash to redeem these senior notes and pay any additional fees.

In March 2016, Ball refinanced in full the Bridge Facility with a \$1.4 billion term A loan facility available to Ball and a €1.1 billion term A loan facility available to a subsidiary of Ball (collectively, the Term Loans), and refinanced in full the 2018 Revolver with the \$1.5 billion 2021 Revolver, in each case under a secured, five-year credit agreement, pursuant to which the term lenders agreed, subject to limited conditions, to provide financing necessary to pay the cash portion of the purchase price payable to Rexam's shareholders upon consummation of the acquisition and related fees and expenses, and the revolving lenders agreed, subject to certain conditions, to make the 2021 Revolver available for general corporate and other specified purposes. These Term Loans and the 2021 Revolver accrue interest at LIBOR plus an applicable margin based on the net leverage ratio of the company, which varies from 1.25 percent to 1.75 percent. The refinancing resulted in \$8 million and \$2 million of write-offs of unamortized deferred financing costs related to the Bridge Facility and the 2018 Revolver, respectively.

---

[Table of Contents](#)

**Ball Corporation**  
**Notes to the Unaudited Condensed Consolidated Financial Statements**

**11. Debt and Interest Costs (continued)**

Fees paid in connection with obtaining financing, which totaled \$32 million during the three months ended March 31, 2016, are classified as other, net in cash flows from financing activities in the unaudited condensed consolidated statements of cash flows.

## 12. Employee Benefit Obligations

(\$ in millions)	March 31, 2016	December 31, 2015
Underfunded defined benefit pension liabilities	\$ 704	\$ 705
Less current portion and prepaid pension assets	(17)	(17)
Long-term defined benefit pension liabilities	687	688
Retiree medical and other postemployment benefits	147	148
Deferred compensation plans	263	281
Other	29	30
	<u>\$ 1,126</u>	<u>\$ 1,147</u>

Components of net periodic benefit cost associated with the company's defined benefit pension plans were:

(\$ in millions)	Three Months Ended March 31,					
	2016			2015		
	U.S.	Foreign	Total	U.S.	Foreign	Total
<b>Ball-sponsored plans:</b>						
Service cost	\$ 12	\$ 3	\$ 15	\$ 13	\$ 4	\$ 17
Interest cost	15	5	20	14	5	19
Expected return on plan assets	(18)	(5)	(23)	(20)	(5)	(25)
Amortization of prior service cost	—	—	—	—	—	—
Recognized net actuarial loss	8	1	9	10	2	12
<b>Net periodic benefit cost for</b>						
Ball-sponsored plans	17	4	21	17	6	23
<b>Net periodic benefit cost for multiemployer</b>						
plans	—	—	—	—	—	—
<b>Total net periodic benefit cost</b>	<u>\$ 17</u>	<u>\$ 4</u>	<u>\$ 21</u>	<u>\$ 17</u>	<u>\$ 6</u>	<u>\$ 23</u>

Contributions to the company's defined benefit pension plans, not including the unfunded German plans, was \$20 million for the first three months of 2016 and insignificant for the first three months of 2015, and are expected to be in the range of \$40 million for the full year of 2016. This estimate may change based on any changes to the U.S. Pension Protection Act and actual plan asset performance, among other factors. Payments to participants in the unfunded German plans were \$5 million in the first three months of 2016 and are expected to be approximately \$18 million for the full year of 2016.

Total before tax effect	(8)	(12)
Tax benefit (expense) on amounts reclassified into earnings	3	4

(a) These components are included in the computation of net periodic benefit cost included in Note 12.

#### 14. Stock-Based Compensation Programs

The company has shareholder-approved stock plans under which options and stock-settled appreciation rights (SSARs) have been granted to employees at the market value of the company's stock at the date of grant. In general, options and SSARs are exercisable in four equal installments commencing one year from the date of grant and terminating 10 years from the date of grant. Approximately 1 million stock options and SSARs were granted in January 2016.

20

#### [Table of Contents](#)

### Ball Corporation Notes to the Unaudited Condensed Consolidated Financial Statements

#### 14. Stock-Based Compensation Programs (continued)

These options and SSARs cannot be traded in any equity market. However, based on the Black-Scholes option pricing model, options and SSARs granted in 2016 and 2015 have estimated weighted average fair values at the date of grant of \$18.58 per share and \$14.20 per share, respectively. The actual value an employee may realize will depend on the excess of the stock price over the exercise price on the date the option or SSAR is exercised. Consequently, there is no assurance that the value realized by an employee will approximate the value estimated. The fair values were estimated using the following weighted average assumptions:

	January 2016	February 2015
Expected dividend yield	0.79%	0.79%
Expected stock price volatility	29.25%	22.11%
Risk-free interest rate	1.57%	1.39%
Expected life of options (in years)	5.94 years	5.85 years

In the first quarters of 2016 and 2015, the company's board of directors granted 118,755 and 116,559 performance-contingent restricted stock units (PCEQs), respectively, to key employees. These PCEQs vest three years from the date of grant, and the number of shares available at the vesting date is based on the company's growth in economic value added (EVA®) dollars in excess of the EVA® dollars generated in the calendar year prior to the grant as the minimum threshold, and can range from zero to 200 percent of each participant's assigned PCEQ award. If the minimum performance goals are not met, the PCEQ will be forfeited. Grants under the plan are being accounted for as equity awards and compensation expense is recorded based upon the most probable outcome using the closing market price of the shares at the grant date. On a quarterly and annual basis, the company reassesses the probability of the goals being met and adjusts compensation expense as appropriate.

#### 15. Earnings (Loss) and Dividends Per Share

(\$ in millions, except per share amounts; shares in thousands)	Three Months Ended March 31,	
	2016	2015
Net earnings (loss) attributable to Ball Corporation	\$ (127)	\$ 21
Basic weighted average common shares	141,793	137,086
Effect of dilutive securities	—	3,990
Weighted average shares applicable to diluted earnings per share	141,793	141,076
Per basic share	\$ (0.90)	\$ 0.15
Per diluted share	\$ (0.90)	\$ 0.15

The company reported a net loss in the first three months of 2016 and, as a result, all potentially issuable securities were excluded in the diluted earnings per share calculation as their effect would have been anti-dilutive. Had these securities been included, weighted average shares applicable to diluted earnings per share would have been 145,100. In the first three months of 2015, approximately 1 million outstanding options were excluded from the diluted earnings per share calculation because they were anti-dilutive (i.e., the sum of the assumed exercise proceeds, including the unrecognized compensation and windfall tax benefits, exceeded the average closing stock price for the period).

The company declared and paid dividends of \$0.13 per share in the first quarters of both 2016 and 2015.

21

#### [Table of Contents](#)

### Ball Corporation Notes to the Unaudited Condensed Consolidated Financial Statements

#### 16. Financial Instruments and Risk Management

The company employs established risk management policies and procedures, which seek to reduce the company's commercial risk exposure to fluctuations in commodity prices, interest rates, currency exchange rates and prices of the company's common stock with regard to common share repurchases and the company's deferred compensation stock plan. However, there can be no assurance that these policies and procedures will be successful. Although the instruments utilized involve varying degrees of credit, market and interest risk, the counterparties to the agreements are expected to perform fully under the terms of the agreements. The company monitors counterparty credit risk, including lenders, on a regular basis, but Ball cannot be certain that all risks will be discerned or that its risk management policies and procedures will always be effective. Additionally, in the event of default under the company's master derivative agreements, the non-defaulting party has the option to set-off any amounts owed with regard to open derivative positions.

## Commodity Price Risk

### Aluminum

The company manages commodity price risk in connection with market price fluctuations of aluminum ingot through two different methods. First, the company enters into container sales contracts that include aluminum ingot-based pricing terms that generally reflect the same price fluctuations under commercial purchase contracts for aluminum sheet. The terms include fixed, floating or pass-through aluminum ingot component pricing. Second, the company uses certain derivative instruments such as option and forward contracts as economic and cash flow hedges of commodity price risk where there are material differences between sales and purchase contracted pricing and volume.

At March 31, 2016, the company had aluminum contracts limiting its aluminum exposure with notional amounts of approximately \$510 million, of which approximately \$469 million received hedge accounting treatment. The aluminum contracts, which are recorded at fair value, include economic derivative instruments that are undesignated, as well as cash flow hedges that offset sales and purchase contracts of various terms and lengths. Cash flow hedges relate to forecasted transactions that expire within the next three years. Included in shareholders' equity at March 31, 2016, within accumulated other comprehensive earnings (loss), is a net after-tax loss of \$15 million associated with these contracts. A net loss of \$12 million is expected to be recognized in the consolidated statement of earnings during the next 12 months, the majority of which will be offset by pricing changes in sales and purchase contracts, thus resulting in little or no earnings impact to Ball.

### Steel

Most sales contracts involving our steel products either include provisions permitting the company to pass through some or all steel cost changes incurred, or they incorporate annually negotiated steel prices.

## Interest Rate Risk

The company's objective in managing exposure to interest rate changes is to minimize the impact of interest rate changes on earnings and cash flows and to lower our overall borrowing costs. To achieve these objectives, the company may use a variety of interest rate swaps, collars and options to manage our mix of floating and fixed-rate debt. Interest rate instruments held by the company at March 31, 2016, included pay-fixed interest rate swaps, which effectively convert variable rate obligations to fixed-rate instruments.

At March 31, 2016, the company had outstanding interest rate swap contracts, excluding those associated with borrowing for the Rexam acquisition, with notional amounts of approximately \$99 million paying fixed rates expiring within the next five years. The after-tax loss included in shareholders' equity at March 31, 2016, within accumulated other comprehensive earnings (loss) is \$2 million.

---

## [Table of Contents](#)

## Ball Corporation

### Notes to the Unaudited Condensed Consolidated Financial Statements

#### 16. Financial Instruments and Risk Management (continued)

##### Interest Rate Risk — Rexam Acquisition

The company entered into interest rate swaps to hedge against rising U.S. and European interest rates to minimize its interest rate exposure associated with debt issuances in connection with the announced, proposed acquisition of Rexam. At March 31, 2016, the company had outstanding interest rate swaps with notional amounts totaling approximately \$200 million and €900 million. In addition, the company entered into interest rate option contracts to hedge negative Euribor rates with an aggregate notional amount of €750 million. In the first quarter of 2016, the company terminated interest rate swap contracts with an aggregate notional amount of \$923 million (€850 million). None of these contracts were designated as hedges, and therefore, changes in the fair value of these interest swap and option contracts are recognized in the unaudited condensed consolidated statements of earnings in debt refinancing and other costs, a component of total interest expense. The loss included in debt refinancing and other costs in the first three months of March 31, 2016, associated with these contracts was \$16 million. The contracts outstanding at March 31, 2016, expire within the next four years.

##### Currency Exchange Rate Risk

The company's objective in managing exposure to currency fluctuations is to limit the exposure of cash flows and earnings from changes associated with currency exchange rate changes through the use of various derivative contracts. In addition, at times the company manages earnings translation volatility through the use of currency option strategies, and the change in the fair value of those options is recorded in the company's net earnings. The company's currency translation risk results from the currencies in which we transact business. The company faces currency exposures in our global operations as a result of various factors including intercompany currency denominated loans, selling our products in various currencies, purchasing raw materials and equipment in various currencies and tax exposures not denominated in the functional currency. Sales contracts are negotiated with customers to reflect cost changes and, where there is not an exchange pass-through arrangement, the company uses forward and option contracts to manage currency exposures. At March 31, 2016, the company had outstanding exchange forward contracts and option contracts, excluding those for the Rexam acquisition, with notional amounts totaling approximately \$934 million. Approximately \$5 million of net after-tax gain related to these contracts is included in accumulated other comprehensive earnings at March 31, 2016, of which a net gain of \$4 million is expected to be recognized in the unaudited condensed consolidated statement of earnings during the next 12 months. The contracts outstanding at March 31, 2016, expire within the next year.

##### Currency Exchange Rate Risk — Rexam Acquisition

In connection with the announced, proposed acquisition of Rexam, the company entered into collar and option contracts to partially mitigate its currency exchange rate risk from February 19, 2015, through the expected closing date of the acquisition. At March 31, 2016, the company had outstanding collar and option contracts with notional amounts totaling approximately £1.6 billion (\$2.3 billion). These contracts were not designated as hedges, and therefore, changes in the fair value of these contracts are recognized in the unaudited condensed consolidated statement of earnings in business consolidation and other activities (see Note 5). During the first quarter of 2016, the company recognized a loss of \$88 million associated with these contracts. The contracts outstanding at March 31, 2016, expire within the next year.

In connection with the December 2015 issuance of \$1 billion of U.S. dollar senior notes due 2020, the company executed cross-currency swaps to convert the fixed-rate U.S. dollar issuance to a fixed-rate euro issuance for the life of the notes to more effectively match the future cash flows of our business. The cross-currency swaps have a notional amount of \$1.0 billion and expire within five years. These contracts were not designated as hedges, and therefore, changes in the fair value of these contracts are recognized as business consolidation and other activities. During the first quarter of 2016, the company recognized a loss of \$36 million associated with these contracts. See Note 5 for additional information.

In connection with the December 2015 issuance of €1.1 billion of senior notes (€400 million due 2020 and €700 million due 2023), the company subsequently converted the net euro proceeds to British pounds using new and existing currency derivative positions at an average exchange rate of approximately 1.37. The company elected to restrict the funds in escrow accounts invested in British money market mutual funds denominated in pounds. At March 31, 2016,

[Table of Contents](#)

**Ball Corporation**  
**Notes to the Unaudited Condensed Consolidated Financial Statements**

**16. Financial Instruments and Risk Management (continued)**

£1.3 billion (\$1.8 billion) was invested in these escrow accounts. Changes in the U.S. dollar to British pound exchange rate will result in gains or losses to the escrow accounts, recognized as business consolidation and other activities. The British pound escrow accounts will be used to pay the cash component of the proposed acquisition price of Rexam.

**Common Stock Price Risk**

The company's deferred compensation stock program is subject to variable plan accounting and, accordingly, is marked to fair value using the company's closing stock price at the end of the related reporting period. The company entered into a total return swap to reduce the company's earnings exposure to these fair value fluctuations that will be outstanding until March 2017 and has a notional value of 1 million shares. Based on current levels in the program, each \$1 change in the company's stock price has an impact, net of derivatives utilized, of \$1 million on pretax earnings.

**Collateral Calls**

The company's agreements with its financial counterparties require the company to post collateral in certain circumstances when the negative mark to fair value of the derivative contracts exceeds specified levels. Additionally, the company has collateral posting arrangements with certain customers on these derivative contracts. The cash flows of the margin calls are shown within the investing section of the company's consolidated statements of cash flows. As of March 31, 2016, and December 31, 2015, the aggregate fair value of all derivative instruments with credit-risk-related contingent features that were in a net liability position were \$198 million and \$69 million, respectively, and no collateral was required to be posted.

[Table of Contents](#)

**Ball Corporation**  
**Notes to the Unaudited Condensed Consolidated Financial Statements**

**16. Financial Instruments and Risk Management (continued)**

**Fair Value Measurements**

The company has classified all applicable financial derivative assets and liabilities as Level 2 within the fair value hierarchy and presented those values in the tables below. The company's assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the valuation of fair value assets and liabilities and their placement within the fair value hierarchy levels. The fair values of the company's derivative instruments were as follows:

(\$ in millions)	March 31, 2016			December 31, 2015		
	Derivatives Designated as Hedging Instruments	Derivatives not Designated as Hedging Instruments	Total	Derivatives Designated as Hedging Instruments	Derivatives not Designated as Hedging Instruments	Total
<b>Assets:</b>

Total noncurrent derivative contracts	<u>\$ 10</u>	<u>\$ 64</u>	<u>\$ 74</u>	<u>\$ 8</u>	<u>\$ 23</u>	<u>\$ 31</u>

The company uses closing spot and forward market prices as published by the London Metal Exchange, the Chicago Mercantile Exchange, Reuters and Bloomberg to determine the fair value of any outstanding aluminum, currency, energy, inflation and interest rate spot and forward contracts. Option contracts are valued using a Black-Scholes model with observable market inputs for aluminum, currency and interest rates. We value each of our financial instruments either internally using a single valuation

technique or from a reliable observable market source. The company does not adjust the value of its financial instruments except in determining the fair value of a trade that settles in the future by discounting the value to its present value using 12-month LIBOR as the discount factor. Ball performs validations of our internally derived fair values reported for our financial instruments on a quarterly basis utilizing counterparty valuation statements. The company additionally evaluates counterparty creditworthiness and, as of March 31, 2016, has not identified any circumstances requiring that the reported values of our financial instruments be adjusted.

**17. Contingencies**

Ball is subject to numerous lawsuits, claims or proceedings arising out of the ordinary course of business, including actions related to product liability; personal injury; the use and performance of company products; warranty matters; patent, trademark or other intellectual property infringement; contractual liability; the conduct of the company's business; tax reporting in domestic and foreign jurisdictions; workplace safety; and environmental and other matters. The company has also been identified as a potentially responsible party (PRP) at several waste disposal sites under U.S. federal and related state environmental statutes and regulations and may have joint and several liability for

any investigation and remediation costs incurred with respect to such sites. Some of these lawsuits, claims and proceedings involve substantial amounts, including as described below, and some of the environmental proceedings involve potential monetary costs or sanctions that may be material. Ball has denied liability with respect to many of these lawsuits, claims and proceedings and is vigorously defending such lawsuits, claims and proceedings. The company carries various forms of commercial, property and casualty, and other forms of insurance; however, such insurance may not be applicable or adequate to cover the costs associated with a judgment against Ball with respect to these lawsuits, claims and proceedings. The company does not believe that these lawsuits, claims and proceedings are material individually or in the aggregate.

As previously reported, the U.S. Environmental Protection Agency (USEPA) considers the company a PRP with respect to the Lowry Landfill site located east of Denver, Colorado. In 1992, the company was served with a lawsuit filed by the City and County of Denver (Denver) and Waste Management of Colorado, Inc., seeking contributions from the company and approximately 38 other companies. The company filed its answer denying the allegations of the complaint. Subsequently in 1992, the company was served with a third-party complaint filed by S.W. Shattuck Chemical Company, Inc., seeking contribution from the company and other companies for the costs associated with cleaning up the Lowry Landfill. The company denied the allegations of the complaint.

Also in 1992, Ball entered into a settlement and indemnification agreement with Chemical Waste Management, Inc., and Waste Management of Colorado, Inc. (collectively Waste Management) and Denver pursuant to which Waste Management and Denver dismissed their lawsuit against the company, and Waste Management agreed to defend, indemnify and hold harmless the company from claims and lawsuits brought by governmental agencies and other parties relating to actions seeking contributions or remedial costs from the company for the cleanup of the site. Waste Management, Inc., has agreed to guarantee the obligations of Waste Management. Waste Management and Denver may seek additional payments from the company if the response costs related to the site exceed \$319 million. In 2003 Waste Management, Inc., indicated that the cost of the site might exceed \$319 million in 2030, approximately three years before the projected completion of the project. In January 2015, Waste Management reported that total project costs to date were approximately \$140 million. The company might also be responsible for payments (based on 1992 dollars) for any additional wastes that may have been disposed of by the company at the site but which are identified after the execution of the settlement agreement. While remediating the site, contaminants were encountered, which could add an additional cleanup cost of approximately

---

[Table of Contents](#)

**Ball Corporation**

**Notes to the Unaudited Condensed Consolidated Financial Statements**

**17. Contingencies (continued)**

\$10 million. This additional cleanup cost could, in turn, add approximately \$1 million to total site costs for the PRP group. At this time, there are no Lowry Landfill actions in which the company is actively involved. Based on the information available to the company at this time, we do not believe that this matter will have a material adverse effect upon the liquidity, results of operations or financial condition of the company.

In November 2012, the USEPA wrote to the company asserting that it is one of at least 50 PRPs with respect to the Lower Duwamish site located in Seattle, Washington, based on the company's ownership of a glass container plant prior to 1995, and notifying the company of a proposed remediation action plan. An allocator has been selected to begin data review on over 30 industrial companies and government entities and at least two PRP groups have begun to discuss various allocation proposals, and this process may last approximately two more years. During the third quarter of 2014, the PRP groups voted to include 20 new members. The USEPA issued the site Record of Decision (ROD) on December 2, 2014. Ball submitted its initial responses to the allocator's questionnaire in March 2015, and after reviewing submissions from the PRPs alleging deficiencies in certain of Ball's responses, the allocator denied certain of the allegations and directed the company to answer others, with supplemental responses expected to be submitted during the first quarter of 2016. Total site remediation costs of \$342 million, to cover remediation of approximately 200 acres of river bottom, are expected according to the proposed remediation action plan, which does not include \$100 million that has already been spent, and which will be allocated among the numerous PRPs in due course. Based on the information available to the company at this time, we do not believe that this matter will have a material adverse effect upon the liquidity, results of operations or financial condition of the company.

In February 2012, Ball Metal Beverage Container Corp. (BMBC) filed an action against Crown Packaging Technology, Inc. (Crown) in the U.S. District Court for the Southern District of Ohio seeking a declaratory judgment that the sale and use of certain ends by BMBC and its customers do not infringe certain claims of Crown's U.S. patents. Crown subsequently filed a counterclaim alleging infringement of certain claims in these patents seeking unspecified monetary damages, fees and declaratory and injunctive relief. The District Court issued a claim construction order at the end of December 2015 and held a scheduling conference on February 10, 2016 to determine the timeline for future steps in the litigation. Activity in the case is now scheduled to resume in the second half of 2016. Based on the information available to the company at the present time, the company does not believe that this matter will have a material adverse effect upon the liquidity, results of operations or financial condition of the company.

The company's operations in Brazil are involved in various governmental assessments, principally related to claims for taxes on the internal transfer of inventory, gross revenue taxes and tax incentives, and which amount to approximately \$7.5 million. The company does not believe that the ultimate resolution of these matters will materially impact the company's results of operations, financial position or cash flows. Under customary local regulations, the company's Brazilian subsidiaries may need to post cash or other collateral if the process to challenge any administrative assessment proceeds to the Brazilian court system; however, the level of any potential cash or collateral required would not significantly impact the liquidity of those subsidiaries or Ball Corporation.

**18. Indemnifications and Guarantees**

*General Guarantees*

The company or its appropriate consolidated direct or indirect subsidiaries have made certain indemnities, commitments and guarantees under which the specified entity may be required to make payments in relation to certain transactions. These indemnities, commitments and guarantees include indemnities to the customers of the subsidiaries in connection with the sales of their packaging and aerospace products and services; guarantees to suppliers of subsidiaries of the company guaranteeing the performance of the respective entity under a purchase agreement, construction contract or other commitment; guarantees in respect of certain foreign subsidiaries' pension plans; indemnities for liabilities associated with the infringement of third party patents, trademarks or copyrights under various types of agreements; indemnities to various lessors in connection with facility, equipment, furniture and other personal property leases for certain claims arising from such leases; indemnities to governmental agencies in connection with the issuance of a permit or license to the company or a subsidiary; indemnities pursuant to agreements relating to certain joint ventures; indemnities in connection with the sale of businesses or substantially all of the assets and specified liabilities of businesses; and indemnities to directors, officers

---

[Table of Contents](#)

**Ball Corporation**

**18. Indemnifications and Guarantees (continued)**

and employees of the company to the extent permitted under the laws of the State of Indiana and the United States of America. The duration of these indemnities, commitments and guarantees varies and, in certain cases, is indefinite.

In addition, many of these indemnities, commitments and guarantees do not provide for any limitation on the maximum potential future payments the company could be obligated to make. As such, the company is unable to reasonably estimate its potential exposure under these items.

The company has not recorded any liability for these indemnities, commitments and guarantees in the accompanying consolidated balance sheets. The company does, however, accrue for payments under promissory notes and other evidences of incurred indebtedness and for losses for any known contingent liability, including those that may arise from indemnifications, commitments and guarantees, when future payment is both reasonably estimable and probable. Finally, the company carries specific and general liability insurance policies and has obtained indemnities, commitments and guarantees from third party purchasers, sellers and other contracting parties, which the company believes would, in certain circumstances, provide recourse to any claims arising from these indemnifications, commitments and guarantees.

*Debt Guarantees*

The company's and its subsidiaries' obligations under the senior notes and senior credit facilities (or, in the case of U.S. domiciled foreign subsidiaries under the senior credit facilities, the obligations of foreign credit parties only) are guaranteed on a full, unconditional and joint and several basis by certain of the company's domestic subsidiaries and the domestic subsidiary borrowers, and obligations of other guarantors and the subsidiary borrowers under the senior credit facilities are guaranteed by the company, in each case with certain exceptions and subject to grace periods. These guarantees are required in support of the senior notes and senior credit facilities referred to above, are co-terminous with the terms of the respective note indentures, senior notes and credit agreement and could be enforced by the holders of the obligations thereunder during the continuation of an event of default under the note indentures, the senior notes or the credit agreement or any other loan document in respect thereof. The maximum potential amounts which could be required to be paid under such guarantees are essentially equal to the then outstanding obligations under the respective senior notes or the credit agreement (or, in the case of U.S. domiciled foreign subsidiaries under the senior credit facilities, the obligations of foreign credit parties only), with certain exceptions. All obligations under the guarantees of the senior credit facilities are secured, with certain exceptions and subject to certain grace periods, by a valid first priority perfected lien or pledge on (i) 100 percent of the capital stock of each of the company's material wholly owned domestic subsidiaries directly owned by the company or any of its wholly owned domestic subsidiaries and (ii) 65 percent of the capital stock of each of the company's material wholly owned first-tier foreign subsidiaries directly owned by the company or any of its wholly owned domestic subsidiaries. In addition, the obligations of certain foreign borrowers and foreign pledgors under the loan documents will be secured, with certain exceptions and subject to certain grace periods, by a valid first priority perfected lien or pledge on 100 percent of the capital stock of certain of the company's material wholly owned foreign subsidiaries and material wholly owned U.S. domiciled foreign subsidiaries directly owned by the company or any of its wholly owned material subsidiaries. The company is not in default under the above senior notes or senior credit facilities. The unaudited condensed consolidating financial information for the guarantor and non-guarantor subsidiaries is presented in Note 19. Separate financial statements for the guarantor subsidiaries and the non-guarantor subsidiaries are not presented because management has determined that such financial statements are not required by the current regulations.

*Accounts Receivable Securitization*

Ball Capital Corp. II is a separate, wholly owned corporate entity created for the purchase of accounts receivable from certain of the company's wholly owned subsidiaries. Ball Capital Corp. II's assets will be available first to satisfy the claims of its creditors. The company has been designated as the servicer pursuant to an agreement whereby Ball Capital Corp. II may sell and assign the accounts receivable to a commercial lender or lenders. As the servicer, the company is responsible for the servicing, administration and collection of the receivables and is primarily liable for the performance of such obligations. The company, the relevant subsidiaries and Ball Capital Corp. II are not in default under the above credit arrangement.

[Table of Contents](#)**Ball Corporation****Notes to the Unaudited Condensed Consolidated Financial Statements****19. Subsidiary Guarantees of Debt**

The company's senior notes are guaranteed on a full, unconditional and joint and several basis by certain of the company's material domestic subsidiaries. Each of the guarantor subsidiaries is 100 percent owned by Ball Corporation. These guarantees are required in support of the notes, are co-terminous with the terms of the respective note indentures and would require performance upon certain events of default referred to in the respective guarantees. The maximum potential amounts that could be required to be paid under the domestic guarantees are essentially equal to the then outstanding principal and interest under the respective notes. The following is unaudited condensed, consolidating financial information for the company, segregating the guarantor subsidiaries and non-guarantor subsidiaries, as of March 31, 2016, and December 31, 2015, and for the three months ended March 31, 2016 and 2015. Separate financial statements for the guarantor subsidiaries and the non-guarantor subsidiaries are not presented because management has determined that such financial statements are not required by the current regulations.

## 20. Subsequent events

In April 2016, Ball entered into an Equity and Asset Purchase Agreement to divest of a metal beverage packaging business (the Divestment Business), which consist of a portion of Ball's existing metal beverage packaging business, as well as select metal beverage can assets of Rexam for approximately \$3.42 billion (subject to customary closing adjustments) in order to satisfy certain regulatory requirements in connection with Ball's proposed acquisition of Rexam. Completion of the sale of the Divestment Business is subject to a number of conditions, including receipt of various regulatory approvals.

## Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

*Management's discussion and analysis should be read in conjunction with the unaudited condensed consolidated financial statements and accompanying notes included in Item 1 of this Quarterly Report on Form 10-Q, which include additional information about our accounting policies, practices and the transactions underlying our financial results. The preparation of our unaudited condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP) requires us to make estimates and assumptions that affect the reported amounts in our unaudited condensed consolidated financial statements and the accompanying notes including various claims and contingencies related to lawsuits, taxes, environmental and other matters arising during the normal course of business. We apply our best judgment, our knowledge of existing facts and circumstances and actions that we may undertake in the future in determining the estimates that affect our consolidated financial statements. We evaluate our estimates on an ongoing basis using our historical experience, as well as other factors we believe appropriate under the circumstances, such as current economic conditions, and adjust or revise our estimates as circumstances change. As future events and their effects cannot be determined with precision, actual results may differ from these estimates. Ball Corporation and its subsidiaries are referred to collectively as "Ball Corporation," "Ball," "the company," "we" or "our" in the following discussion and analysis.*

### OVERVIEW

#### *Business Overview and Industry Trends*

Ball Corporation is one of the world's leading suppliers of metal packaging to the beverage, food, personal care and household products industries. Our packaging products are produced for a variety of end uses, are manufactured in facilities around the world and are competitive with other substrates, such as plastics and glass. In the rigid packaging industry, sales and earnings can be increased by reducing costs, increasing prices, developing new products, expanding volumes and making strategic acquisitions. We also provide aerospace and other technologies and services to governmental and commercial customers.

We sell our packaging products mainly to large, multinational beverage, food, personal care and household products companies with which we have developed long-term customer relationships. This is evidenced by our high customer retention and our large number of long-term supply contracts. While we have a diversified customer base, we sell a majority of our packaging products to relatively few major companies in North America, Europe, Asia and South America, as do our equity joint ventures in the U.S. and Vietnam. The overall metal container industry is growing globally and is expected to continue to grow in the medium to long term despite the North American industry seeing a continued decline in standard-sized aluminum beverage packaging for the carbonated soft drink market. The primary customers for the products and services provided by our aerospace and technologies segment are U.S. government agencies or their prime contractors.

We purchase our raw materials from relatively few suppliers. We also have exposure to inflation, in particular the rising costs of raw materials, as well as other direct cost inputs. We mitigate our exposure to the changes in the costs of metal through the inclusion of provisions in contracts covering the majority of our volumes to pass through metal price changes, as well as through the use of derivative instruments. The pass-through provisions generally result in proportional increases or decreases in sales and costs with a greatly reduced impact, if any, on net earnings. Because of our customer and supplier concentration, our business, financial condition and results of operations could be adversely affected by the loss, insolvency or bankruptcy of a major customer or supplier or a change in a supply agreement with a major customer or supplier, although our contract provisions generally mitigate the risk of customer loss, and our long-term relationships represent a known, stable customer base.

We recognize sales under long-term contracts in the aerospace and technologies segment using percentage-of-completion under the cost-to-cost method of accounting. Throughout the period of contract performance, we regularly reevaluate and, if necessary, revise our estimates of aerospace and technologies total contract revenue, total contract cost and progress toward completion. Because of contract payment schedules, limitations on funding and other contract terms, our sales and accounts receivable for this segment include amounts that have been earned but not yet billed.

---

### [Table of Contents](#)

#### *Corporate Strategy*

Our Drive for 10 vision encompasses five strategic levers that are key to growing our business and achieving long-term success. Since launching Drive for 10 in 2011, we made progress on each of the levers as follows:

- Maximizing value in our existing businesses by rationalizing standard beverage container and end capacity in North America and expanding specialty container production to meet current demand; leveraging plant floor systems in our metal beverage facilities to improve efficiencies and reduce costs; consolidating and/or closing multiple metal beverage and metal food and aerosol packaging facilities to gain business, customer and supplier efficiencies; and implementing cost-out and value-in initiatives across all of our businesses;
- Expanding further into new products and capabilities by expanding into extruded aluminum aerosol manufacturing with the installation of a new extruded aluminum aerosol line in our DeForest, Wisconsin, facility during 2014; the acquisition of Sonoco's metal end and closure manufacturing facilities in Canton, Ohio, in February 2015; the installation of new extruded aluminum aerosol lines in our Devizes, United Kingdom, and Czech Republic facilities; and successfully commercializing extruded aluminum aerosol packaging that utilizes a significant amount of recycled material;
- Aligning ourselves with the right customers and markets by investing capital to meet double-digit volume growth for specialty beverage containers throughout our global network, which now represent approximately 30 percent of our global beverage packaging mix; successfully commercialized the next generation aluminum bottle-shaping technology in Conroe, Texas, for a customer under a long-term arrangement; and the construction of a metal beverage container facility in Monterrey, Mexico, producing cans and ends;

- Broadening our geographic reach with new investments in a metal beverage manufacturing facility in Myanmar, as well as an extruded aluminum aerosol manufacturing facility in India, and the construction of a metal beverage container facility in Monterrey, Mexico, producing cans and ends; and
- Leveraging our technological expertise in packaging innovation, including the introduction of next-generation aluminum bottle-shaping technologies, including the introduction of a new two-piece, lightweight steel aerosol can, G3, technology in our Chestnut Hill, Tennessee, facility in December 2015; and pursuing opportunities to further enhance our aerospace technical expertise across a broader customer portfolio.

These ongoing business developments help us stay close to our customers while expanding and/or sustaining our industry positions with major beverage, food, personal care, household products and aerospace customers.

## RESULTS OF CONSOLIDATED OPERATIONS

Management's discussion and analysis for the results of operations on a consolidated and segment basis include a quantification of factors that had a material impact. Other factors that did not have a material impact, but that are significant to understand the results are qualitatively described.

### Consolidated Sales and Earnings

(\$ in millions)	Three Months Ended March 31,	
	2016	2015
Net sales	\$ 1,756	\$ 1,923
Net earnings (loss) attributable to Ball Corporation	(127)	21
Net earnings (loss) attributable to Ball Corporation as a % of consolidated net sales	-7.2%	1.1%

Sales in the first quarter of 2016 decreased compared to the first quarter of 2015 primarily as a result of the pass through of lower metal input costs of \$76 million. Other items significantly impacting revenue were lower net pricing in China, lower currency exchange effects in Europe and the completion of two significant U.S. government programs in our Aerospace segment, all of which were partially offset by higher metal beverage sales volumes. Net earnings were lower in 2016 compared to 2015 due to increased business consolidation and other activities of \$215 million and lower net pricing in China of

### [Table of Contents](#)

\$20 million, partially offset by an increase of \$84 million in tax benefits, which resulted from the significant business consolidation costs and debt refinancing and other costs incurred in the first quarter of 2016.

### Cost of Sales (Excluding Depreciation and Amortization)

Cost of sales, excluding depreciation and amortization, was \$1,416 million in the first quarter of 2016 compared to \$1,561 million in the first quarter of 2015. These amounts represented 81 percent of consolidated net sales in 2016 and 2015.

### Depreciation and Amortization

Depreciation and amortization expense was \$75 million in the first quarter of 2016 compared to \$68 million in the first quarter of 2015. These amounts represented 4 percent of consolidated net sales in 2016 and 2015.

### Selling, General and Administrative

Selling, general and administrative (SG&A) expenses were \$108 million in the first quarter of 2016 compared to \$116 million in the first quarter of 2015. These amounts represented 6 percent of consolidated net sales in 2016 and 2015. The decrease in SG&A in 2016 compared to 2015 was due to individually immaterial items.

### Business Consolidation Costs and Other Activities

Business consolidation and other activities were \$267 million in the first quarter of 2016 compared to \$52 million in the first quarter of 2015. These amounts represented 15 percent of consolidated net sales in 2016 and 3 percent in 2015. The increase in business consolidation and other activities in 2016 compared to 2015 was primarily due to foreign currency exchange losses of \$96 million on the restricted cash and debt, an increase in unrealized losses of \$60 million related to the change in fair value of its collar and option contracts, and unrealized losses in cross-currency swaps of \$36 million, all associated with the proposed Rexam acquisition. The valuations of currency exchange and interest rates are a primary driver for the amounts recorded in business consolidation costs and other activities, and we are unable to determine whether these values will increase or decrease in the future. See Notes 4, 5 and 16 located in Item 1 of this quarterly report for additional information on financial instruments.

### Interest Expense

Total interest expense was \$99 million in the first quarter of 2016 compared to \$98 million in the first quarter of 2015. Excluding debt refinancing and other costs, interest expense in 2016 was comparable to 2015. Interest expense, excluding the effect of debt extinguishment costs and derivative activities, as a percentage of average monthly borrowings was 5.3 percent in the first quarter of 2016 compared to 5.0 percent in the first quarter of 2015.

Debt refinancing and other costs were \$61 million in the first quarter of 2016 compared to \$60 million in the first quarter of 2015. The first quarter of 2016 consisted mainly of charges to fund a portion of the cash component of the proposed Rexam acquisition purchase price: (1) interest expense of \$25 million on the 3.5 percent and 4.375 percent senior notes issued in December 2015, (2) fair value changes of \$16 million on derivative instruments designed to mitigate risks of interest rate changes with debt issuances, (3) write-offs of unamortized deferred financing fees and the premium paid of \$10 million for the extinguishment of both the Bridge Facility and the 2018 Revolver and \$3 million of interest on Term A U.S. dollar and Term A euro dollar loans, and (4) the amortization of \$7 million in deferred financing fees on the Bridge Facility. The first quarter of 2015 debt refinancing costs consisted mainly of the \$58 million for the redemption of the 6.75 percent and 5.75 percent senior notes, which were due September 2020 and May 2021, respectively and the refinance of senior credit facilities. See Note 5 in Item 1 of this quarterly report for additional information on these instruments and the transactions flowing through debt refinancing and other costs.

### Taxes

The effective tax rate is affected by recurring items such as income earned in foreign jurisdictions with tax rates that differ from the U.S. tax rate and by discrete items that may occur in any given year but are not consistent from year to year. The effective income tax rate in the first quarter of 2016 was 39.7 percent compared to 1.8 percent in the first

quarter of 2015.

In the first quarter of 2016, a significant amount of nonrecurring business consolidation costs and deferred financing and other debt related costs was incurred, primarily in the U.S. These costs and the resultant decrease to earnings before

[Table of Contents](#)

income tax in the U.S. increased the overall effect of the permanent items and the impact of the foreign tax rate differential versus U.S. tax on the global effective tax rate for the first quarter of 2016 as compared to the first quarter of 2015. The effect of these nonrecurring costs in the U.S. was a 37.9 percent increase in the effective tax rate for the first quarter of 2016 over the first quarter of 2015. The full-year 2016 effective income tax rate is expected to be approximately 8.4 percent.

**RESULTS OF BUSINESS SEGMENTS**

Ball's operations are organized and reviewed by management along its product lines and geographical areas and presented in the four reportable segments discussed below.

*Metal Beverage Packaging, Americas and Asia*

(\$ in millions)	Three Months Ended March 31,	
	2016	2015
Net sales	\$ 937	\$ 1,023
Segment earnings	\$ 102	\$ 125
Business consolidation and other activities (a)	(4)	(2)
Total segment earnings	\$ 98	\$ 123
Segment earnings before business consolidation costs as a % of segment net sales	10.9%	12.2%

(a) Further details of these items are included in Note 5 to the unaudited condensed consolidated financial statements within Item 1 of this report.

The metal beverage packaging, Americas and Asia, segment consists of operations located in the U.S., Canada, Brazil and the PRC, which manufacture aluminum containers used in beverage packaging.

During the first quarter of 2016, our metal beverage can and end manufacturing facility in Monterrey, Mexico, began production. Our beverage can and end manufacturing facility in Myanmar is expected to begin production during the summer of 2016.

Segment sales in the first quarter of 2016 were \$86 million lower compared to the first quarter of 2015, mainly due to the pass through of lower metal input prices of \$76 million and lower net pricing in China of \$20 million. Increased sales volume partially offset these impacts. We cannot predict whether lower metal input prices will continue in the future. Segment earnings in the first quarter of 2016 were \$23 million lower compared to the first quarter of 2015 primarily due to lower net pricing in China of \$20 million. Other significant items impacting the year-over-year results were startup costs related to Monterrey, Mexico, which were partially offset by the aforementioned increased sales volumes. Lower net prices in China are expected to continue in the short-term and cost reduction measures have been put in place to mitigate this impact.

*Metal Beverage Packaging, Europe*

(\$ in millions)	Three Months Ended March 31,	
	2016	2015
Net sales	\$ 356	\$ 379
Segment earnings	\$ 39	\$ 29
Business consolidation and other activities (a)	(4)	(2)
Total segment earnings	\$ 35	\$ 27
Segment earnings before business consolidation costs as a % of segment net sales	11.0%	7.6%

[Table of Contents](#)

(a) Further details of these items are included in Note 5 to the unaudited condensed consolidated financial statements within Item 1 of this report.

The metal beverage packaging, Europe, segment includes the manufacture and sale of metal beverage containers in facilities located throughout Europe.

Segment sales in the first quarter of 2016 were \$23 million lower compared to the first quarter of 2015. Significant items leading to the lower sales were lower volume and lower currency exchange effects. Segment earnings in the first quarter of 2016 were \$10 million higher compared to the first quarter of 2015, primarily due to lower metal premiums of \$14 million, partially offset by lower currency exchange effects. It is uncertain as to whether lower metal premiums will continue in the future.

*Metal Food and Household Products Packaging*

(\$ in millions)	Three Months Ended March 31,	
	2016	2015
Net sales	\$ 284	\$ 308

Segment earnings	\$	20	\$	30
Business consolidation and other activities (a)		(14)		—
Total segment earnings	\$	6	\$	30

Segment earnings before business consolidation costs as a % of segment net sales 7.0% 9.7%

(a) Further details of these items are included in Note 5 to the unaudited condensed consolidated financial statements within Item 1 of this report.

The metal food and household products packaging segment consists of operations located in the U.S., Europe, Canada, Mexico, Argentina and India that manufacture and sell metal food, aerosol, paint, general line and extruded aluminum containers, as well as decorative specialty containers and aluminum slugs.

In February 2015, we completed the acquisition of Sonoco's metal end and closure manufacturing facilities in Canton, Ohio; further details are available in Note 4 to the unaudited condensed consolidated financial statements included within Item 1 of this report.

Segment sales in the first quarter of 2016 were \$24 million lower compared to the first quarter of 2015 primarily as a result of lower food can sales volumes of \$10 million and other individually immaterial items. It is uncertain as to whether the lower food can sales volumes will continue. Segment earnings in the first quarter of 2016 were \$10 million lower compared to the first quarter of 2015 due to a number of individually immaterial items.

#### Aerospace and Technologies

(\$ in millions)	Three Months Ended March 31,	
	2016	2015
Net sales	\$ 180	\$ 215
Segment earnings	\$ 18	\$ 20
Business consolidation and other activities (a)	—	1
Total segment earnings	\$ 18	\$ 21
Segment earnings before business consolidation costs as a % of segment net sales	10.0%	9.3%

(a) Further details of these items are included in Note 5 to the unaudited condensed consolidated financial statements within Item 1 of this report.

#### [Table of Contents](#)

The aerospace and technologies segment consists of the manufacture and sale of aerospace and other related products and services provided for the defense, civil space and commercial space industries.

Segment sales in the first quarter of 2016 decreased by \$35 million compared to the first quarter of 2015 and segment earnings decreased by \$2 million. These decreases were primarily the result of two U.S. government contracts that were nearing completion in the first quarter of 2016. Revenues for these two programs were \$28 million lower in the first quarter of 2016 compared to the first quarter of 2015 and the impact on segment earnings was immaterial.

The aerospace and technologies sales contract mix in the first three months of 2016 consisted of 52 percent cost-type contracts, which are billed at our costs plus an agreed upon and/or earned profit component, and 42 percent fixed-price contracts. Contracted backlog was \$733 million at March 31, 2016, compared to \$617 million at December 31, 2015. The backlog at March 31, 2016, consisted of 39 percent fixed price contracts. Comparisons of backlog are not necessarily indicative of the trend of future operations due to the nature of varying delivery and milestone schedules on contracts, funding of programs and the uncertainty of timing of future contract awards.

#### Additional Segment Information

For additional information regarding our segments, see the business segment information in Note 3 accompanying the unaudited condensed consolidated financial statements included within Item 1 of this report. The charges recorded for business consolidation and other activities were based on estimates by management and were developed from information available at the time the amounts were recognized. If actual outcomes vary from the estimates, the differences will be reflected in current period earnings in the statement of earnings and identified as business consolidation gains and losses. Additional details about our business consolidation and other activities, as well as the associated costs, are provided in Note 5 to the unaudited condensed consolidated financial statements included within Item 1 of this report.

#### NEW ACCOUNTING PRONOUNCEMENTS

For information regarding recent accounting pronouncements, see Note 2 to the unaudited condensed consolidated financial statements within Item 1 of this report on Form 10-Q.

#### PROPOSED ACQUISITION OF REXAM PLC (REXAM)

On February 19, 2015, the company and Rexam PLC (Rexam) announced the terms of a recommended offer by the company to acquire all of the outstanding shares of Rexam in a cash and stock transaction. Under the terms of the offer, for each Rexam share, Rexam shareholders will receive 407 pence in cash and 0.04568 shares of the company. The transaction valued Rexam at 610 pence per share based on the company's 90-day volume weighted average stock price as of February 17, 2015, and an exchange rate of US \$1.54: £1 on that date representing an equity value of £4.3 billion (\$6.6 billion). The actual value of the transaction will be determined based on the exchange rate and the company's stock price at the time of the closing of the transaction. As described below, the company has entered into collar, option and swap contracts to partially mitigate its currency exchange risk with regard to the cash component of the purchase price.

By way of compensation for any loss suffered by Rexam in connection with the preparation and negotiation of the offer, the co-operation agreement and any other document relating to the acquisition, Ball has undertaken in the co-operation agreement that, on the occurrence of a break payment event Ball will pay, or procure the payment to Rexam of an amount in cash in British pounds. As discussed below, Ball's shareholders approved the issuance of Ball common stock to shareholders of Rexam as partial consideration for the proposed acquisition. As a result, the amount of the break payment would be £302 million upon the occurrence of a break payment event.

A special meeting of Ball's shareholders was held on July 28, 2015, at which our shareholders approved the issuance of Ball common stock to shareholders of Rexam as partial consideration for the proposed acquisition. Both Ball and Rexam's boards of directors unanimously support the transaction, and the consummation of the transaction remains subject to approval from Rexam's shareholders, certain regulatory approvals and other customary closing conditions.

Ball expects that obtaining final regulatory approval by the European Commission (EC), Brazil's Council for Economic Defence (CADE) and the U.S. Federal Trade Commission (FTC) will ultimately require Ball to divest certain assets. Subject to receipt of such approvals and the satisfaction of all such conditions, Ball currently expects to complete the Rexam acquisition and related divestitures in late June 2016; however, there can be no assurances that the Rexam

---

[Table of Contents](#)

acquisition or the related divestitures will be completed by such time, or on the terms described herein, or at all. To date, the EC and CADE have provided conditional clearance of the proposed acquisition, subject to their approval of the proposed buyer of the divested assets, terms of the divestiture sale and other customary regulatory processes.

In late 2015, Ball completed the acquisition of the remaining outstanding noncontrolling interests in a Ball-controlled joint venture company (Latapack-Ball) organized and operating in Brazil. During October and November 2015, Ball and its joint venture partners reached an agreement for the partners to exchange all of their interest in Latapack-Ball for a total of approximately 5.7 million treasury shares of Ball common stock and \$17.4 million of cash. The acquisition of the noncontrolling interests in the joint venture was completed in December 2015, and Latapack-Ball is now a wholly owned subsidiary of Ball.

*Long-term Debt*

On February 19, 2015, the company entered into a £3.3 billion Bridge Facility, pursuant to which lending institutions agreed, subject to limited conditions, to provide the financing necessary to pay the cash portion of the consideration payable to Rexam's shareholders upon consummation of the announced, proposed acquisition of Rexam along with related fees and expenses. In December 2015, the company issued senior notes totaling \$1 billion, €400 million and €700 million due 2020, 2020, and 2023, respectively, with rates of 4.375 percent, 3.5 percent and 4.375 percent, respectively. Pursuant to the terms of the Bridge Facility, the company deposited the net proceeds from the issuance of such notes into escrow accounts, recorded as restricted cash (from which proceeds would be released, subject to certain conditions, to pay a portion of the cash consideration payable to Rexam shareholders and related fees and expenses), which reduced the commitments under the Bridge Facility to £1.9 billion. If the Rexam acquisition is not consummated on or prior to November 15, 2016, we will be required to effect the redemption of all of the outstanding notes from the December 2015 senior note issuances at the redemption price applicable to each series. This would result in the use of restricted cash and other available funds to redeem these senior notes and pay any additional fees. However, the senior note offerings are not conditioned upon the Rexam acquisition. See Note 11 for further details related to these transactions.

On February 19, 2015, the company entered into a \$3 billion 2018 Revolver to replace its then existing approximate \$1 billion revolving credit facility, repay its \$93 million Term C loan, repay the outstanding balance on the existing revolving credit facility, redeem the 2020 and 2021 senior notes and provide ongoing liquidity for the company. In June 2015, during a subsequent debt offering, the company issued \$1 billion of 5.25 percent senior notes, thereby reducing the borrowing capacity under the revolving credit facility from \$3 billion to \$2.25 billion. In March 2016, the 2018 Revolver was refinanced in full with a \$1.5 billion multi-currency revolving credit facility. See Note 11 for further details related to these transactions.

On March 18, 2016, Ball refinanced the Bridge Facility in full with a \$1.4 billion Term A loan facility available to Ball and a €1.1 billion Term A loan facility available to a subsidiary of Ball, and refinanced the 2018 Revolver in full with a \$1.5 billion 2021 Revolver, in each case under a secured, five-year credit agreement, pursuant to which the term lenders thereunder agreed, subject to limited conditions, to provide financing necessary to pay the cash portion of the consideration payable to Rexam's shareholders upon consummation of the Rexam acquisition and related fees and expenses, and the revolving lenders thereunder agreed, subject to certain conditions, to make the 2021 Revolver available for general corporate and other specified purposes. See Note 11 for further details related to these transactions.

*Currency Exchange Rate and Interest Rate Risks*

The company entered into collar and option contracts to partially mitigate its currency exchange rate risk associated with the British pound denominated cash portion of the purchase price from February 19, 2015, through the expected closing date of the announced, proposed acquisition of Rexam, with an aggregate notional amount of approximately £1.6 billion (\$2.3 billion) at March 31, 2016. In connection with the December 2015 issuance of \$1 billion of U.S. dollar senior notes due 2020, the company executed cross-currency swaps to convert this fixed-rate U.S. dollar debt issuance to fixed-rate euro debt for the life of the notes to more effectively match the future cash flows of our business. At March 31, 2016, the cross-currency swaps have a notional amount of \$1 billion. These contracts were not designated as hedges, and therefore, changes in the fair value of these contracts are recorded in the unaudited condensed consolidated statements of earnings in business consolidation and other activities.

The company entered into interest rate swaps to hedge against rising U.S. and European interest rates to minimize its interest rate exposure associated with anticipated debt issuances in connection with the proposed Rexam acquisition. At March 31, 2016, the company had U.S. and European outstanding interest rate swaps with notional amounts totaling approximately \$200 million and €900 million, respectively. In addition, the company entered into interest rate option

---

[Table of Contents](#)

contracts to hedge negative Euribor rates with an aggregate notional amount of €750 million. In the first quarter of 2016, the company terminated interest rate swap contracts with an aggregate notional amount of \$923 million (€850 million). These contracts were not designated as hedges; therefore, changes in the fair value of these interest swap and option contracts are recorded in the unaudited condensed consolidated statements of earnings in debt refinancing and other costs, a component of total interest expense.

For further details related to the aforementioned currency exchange rate and interest rate risks, and the valuation of these derivatives, see Notes 5 and 16.

**SUBSEQUENT EVENTS**

In April 2016, Ball entered into an Equity and Asset Purchase Agreement to divest of a metal beverage packaging business (the Divestment Business), which consist of a portion of Ball's existing metal beverage packaging business, as well as select metal beverage can assets of Rexam for approximately \$3.42 billion (subject to customary closing adjustments) in order to satisfy certain regulatory requirements in connection with Ball's proposed acquisition of Rexam. Completion of the sale of the Divestment Business is subject to a number of conditions, including receipt of various regulatory approvals.

*Management Performance Measures*

Management internally uses various measures to evaluate company performance such as return on average invested capital (net operating earnings (loss) after tax over the relevant performance period divided by average invested capital over the same period); economic value added (EVA®) dollars (net operating earnings (loss) after tax less a capital charge on average invested capital employed); earnings before interest and taxes (EBIT); earnings (loss) before interest, taxes, depreciation and amortization (EBITDA); and diluted earnings (loss) per share. We believe this information is also useful to investors as it provides insight into the earnings criteria management uses to make strategic decisions. These financial measures may be adjusted at times for items that affect comparability between periods such as business consolidation costs and gains or losses on acquisitions and dispositions.

Nonfinancial measures in the packaging businesses include production efficiency and spoilage rates; quality control figures; environmental, health and safety statistics; production and sales volumes; asset utilization rates; and measures of sustainability. Additional measures used to evaluate financial performance in the aerospace and technologies segment include contract revenue realization, award and incentive fees realized, proposal win rates and backlog (including awarded, contracted and funded backlog).

The following financial measurements are on a non-U.S. GAAP basis and should be considered in connection with the unaudited condensed consolidated financial statements within Item 1 of this report. Non-U.S. GAAP measures should not be considered in isolation and should not be considered superior to, or a substitute for, financial measures calculated in accordance with U.S. GAAP. A presentation of earnings in accordance with U.S. GAAP is available in Item 1 of this report.

Based on the above definitions, our calculation of comparable EBIT is summarized below:

(\$ in millions)	Three Months Ended March 31,	
	2016	2015
Net earnings (loss) attributable to Ball Corporation	\$ (127)	\$ 21
Add: net earnings attributable to noncontrolling interests	—	7
Net earnings (loss)	(127)	28
Less: Equity in results of affiliates, net of tax	1	(1)
Add: Tax provision (benefit)	(83)	1
Earnings (loss) before taxes, as reported	(209)	28
Add: Total interest expense	99	98
Earnings (loss) before interest and taxes (EBIT)	(110)	126
Add: Business consolidation and other activities	267	52
Comparable EBIT	\$ 157	\$ 178

43

## [Table of Contents](#)

Our calculations of comparable EBITDA, the comparable EBIT to interest coverage ratio and the net debt to comparable EBITDA ratio are summarized below:

(\$ in millions, except ratios)	Twelve Months Ended March 31, 2016	
Net earnings attributable to Ball Corporation	\$	133
Add: net earnings attributable to noncontrolling interests		15
Net earnings		148
Less: Equity in results of affiliates, net of tax		(3)
Add: Tax provision (benefit)		(37)
Earnings before taxes		108
Add: total interest expense		261
Earnings before interest and taxes (EBIT)		369
Add: business consolidation and other activities		410
Comparable EBIT		779
Add: depreciation and amortization		292
Comparable EBITDA	\$	1,071
Interest expense, excluding debt refinancing and other costs (Interest Expense)	\$	(143)
Total debt at March 31, 2016	\$	5,799
Less: cash and cash equivalents		(205)
Less: restricted cash, non-current		(2,099)
Net debt	\$	3,495
Comparable EBIT/Interest expense		5.4x
Net debt/Comparable EBITDA		3.3x

Our calculation of comparable net earnings is summarized below:

(\$ in millions, except per share amounts)	Three Months Ended March 31,	
	2016	2015
Net earnings (loss) attributable to Ball Corporation	\$ (127)	\$ 21
Add: Business consolidation and other activities, net of tax	173	37
Add: Debt refinancing and other costs, net of tax	40	39
Comparable Net Earnings	\$ 86	\$ 97
Per diluted share, as reported	\$ (0.90)	\$ 0.15
Per diluted share, comparable basis	\$ 0.59(a)	\$ 0.69

- (a) The Company reported a U.S. GAAP net loss in the first three months of 2016 and, as a result, all potentially issuable securities were excluded in the diluted earnings per share calculation as their effect would have been anti-dilutive. Had the securities been included, weighted average shares applicable to diluted earnings per share would have been 145,100. Comparable net earnings for the first three months of 2016 was positive; therefore, 145,100 weighted average shares were used to calculate diluted earnings per share for comparable net earnings.

## FINANCIAL CONDITION, LIQUIDITY AND CAPITAL RESOURCES

### *Cash Flows and Capital Expenditures*

Our primary sources of liquidity are cash provided by operating activities and external committed borrowings. We believe that cash flows from operations and cash provided by short-term, long-term and committed revolver borrowings, when necessary, will be sufficient to meet our ongoing operating requirements, scheduled principal and interest payments on debt, dividend payments, proposed acquisitions, including the announced, proposed acquisition of Rexam, and anticipated capital expenditures.

44

### [Table of Contents](#)

The following summarizes our cash flows:

(\$ in millions)	Three Months Ended March 31,	
	2016	2015
Cash flows provided by (used in) operating activities	\$ (386)	\$ (181)
Cash flows provided by (used in) investing activities	(185)	(120)
Cash flows provided by (used in) financing activities	572	328

Cash flows from operations in the first three months of 2016 were lower compared to the first three months of 2015 due primarily to higher outflows from working capital changes. The outflows of working capital were primarily related to (1) higher days sales outstanding in the first quarter of 2016 of 47 days (annualized) compared to 43 days in the first quarter of 2015 (annualized) and (2) the reduction of days payable outstanding in the first quarter of 2016 to 78 days (annualized) from the days payable outstanding in the fourth quarter of 2015 of 91 days (annualized).

We have entered into several regional committed and uncommitted accounts receivable factoring programs with various financial institutions for certain accounts receivable of the company. The programs are accounted for as true sales of the receivables, without recourse to Ball, and had combined limits of approximately \$593 million at March 31, 2016. A total of \$442 million and \$479 million were sold under these programs as of March 31, 2016, and December 31, 2015, respectively.

Contributions to the company's defined benefit pension plans, not including the unfunded German plans, were \$20 million for the first three months of 2016 and insignificant for the first three months of 2015, and are expected to be in the range of \$40 million for the full year. This estimate may change based on changes in the U.S. Pension Protection Act and actual plan asset performance, among other factors. Payments to participants in the unfunded German plans were \$5 million in the first three months of 2016 and are expected to be approximately \$18 million for the full year.

We expect 2016 capital expenditures for property, plant and equipment to be in the range of \$400 million, and approximately \$185 million was contractually committed as of March 31, 2016. Capital expenditures are expected to be funded by cash flows from operations.

As of March 31, 2016, approximately \$197 million of our cash was held outside of the U.S. There are no material legal or other economic restrictions regarding the repatriation of cash from any of the countries outside the U.S. where we have cash. The company believes its U.S. operating cash flows; the \$1.5 billion available under the company's long-term, revolving credit facility; the \$578 million available under other U.S.-based uncommitted short-term credit facilities; availability under U.S.-based committed and uncommitted accounts receivable factoring programs; and availability under the U.S.-based accounts receivable securitization program will be sufficient to meet the cash requirements of the U.S. portion of the company's ongoing operations, scheduled principal and interest payments on U.S. debt, dividend payments, capital expenditures and other U.S. cash requirements. If foreign funds are needed for our U.S. cash requirements, we will be required to accrue and pay U.S. taxes, net of applicable foreign tax credits, to repatriate funds from foreign locations where the company has previously asserted indefinite reinvestment of funds outside the U.S. However, it continues to be the company's intent to permanently reinvest these foreign amounts outside the U.S., and our current plans do not demonstrate a need to repatriate the foreign amounts to fund our U.S. cash requirements.

### *Share Repurchases*

Our share repurchases, net of issuances, totaled \$91 million in the first three months of 2016. There were no open market repurchases during the first three months of 2015. Share repurchases are completed using cash on hand and available borrowings.

45

### [Table of Contents](#)

### *Debt Facilities and Refinancing*

Given our cash flow projections and unused credit facilities that are available until March 2021, our liquidity is strong and is expected to meet our ongoing cash and debt service requirements. Interest-bearing debt of \$5.8 billion at March 31, 2016, was higher than the amount outstanding at December 31, 2015, of \$5.1 billion due to seasonal working capital requirements and to fund a portion of the proposed Rexam acquisition.

On February 19, 2015, the company entered into a £3.3 billion Bridge Facility, pursuant to which lending institutions agreed, subject to limited conditions, to provide financing necessary to pay the cash portion of the consideration payable to Rexam shareholders upon consummation of the announced, proposed acquisition of Rexam and related fees and expenses. In December 2015, the company issued \$1 billion of 4.375 percent senior notes and €400 million of 3.5 percent senior notes, all due in December 2020, and €700 million of 4.375 percent senior notes, due in December 2023. Pursuant to the terms of the Bridge Facility, the company deposited the net proceeds from the issuance of such notes into an escrow account (from which proceeds would be released, subject to certain conditions, to pay a portion of the cash consideration payable to Rexam shareholders and related fees and expenses), which reduced the commitments under the Bridge Facility availability to £1.9 billion. If the Rexam acquisition is not consummated on or prior to November 15, 2016, we will be required to effect the redemption of all of the outstanding notes from the December 2015 senior note issuances at the redemption price applicable to each series. This would result in the use of restricted cash and other available funds to redeem these senior notes and pay any additional fees. However, the senior note offerings are not conditioned upon the Rexam acquisition. See Note 11 for further details related to these transactions.

On February 19, 2015, the company entered into a \$3 billion 2018 Revolver to replace its then existing approximate \$1 billion revolving credit facility, repay its \$93 million Term C loan, repay the outstanding balance on the existing revolving credit facility, redeem the 2020 and 2021 senior notes and provide ongoing liquidity for the company. In June 2015, during a subsequent debt offering, the company issued \$1 billion of 5.25 percent senior notes, thereby reducing the borrowing capacity under the revolving credit facility from \$3 billion to \$2.25 billion. In March 2016, the 2018 Revolver was refinanced in full with a \$1.5 billion multi-currency revolving credit facility. See Note 11 for further details related to these transactions.

On March 18, 2016, Ball refinanced the Bridge Facility in full with a \$1.4 billion Term A loan facility available to Ball and a €1.1 billion Term A loan facility available to a subsidiary of Ball, and refinanced the 2018 Revolver in full with a \$1.5 billion multi-currency revolving credit facility available to Ball and certain of its subsidiaries (the 2021 Revolver), in each case under a secured, five-year credit agreement, pursuant to which the term lenders thereunder agreed, subject to limited conditions, to provide financing necessary to pay the cash portion of the consideration payable to Rexam's shareholder upon consummation of the Rexam acquisition and related fees and expenses, and the revolving lenders thereunder agreed, subject to certain conditions, to make the 2021 Revolver available for general corporate and other specified purposes. See Note 11 for further details related to these transactions.

At March 31, 2016, taking into account outstanding credit and excluding availability under the accounts receivable securitization program, approximately \$1.1 billion was available under the company's long-term, multi-currency committed revolving credit facilities. In addition to these facilities, the company had approximately \$578 million of short-term uncommitted credit facilities available at March 31, 2016, of which \$223 million was outstanding and due on demand. The company has additional availability of \$1.4 billion and €1.1 billion (\$1.3 billion) Term A loan facilities. Of the amounts available under the credit facilities and Term Loans described above of approximately \$4.4 billion, we will be required to repay certain of Rexam's debt obligations and to settle Rexam's outstanding derivatives. Our best estimate based on the latest issued financials for Rexam is that this will be \$1.4 billion.

---

[Table of Contents](#)

While ongoing financial and economic conditions raise concerns about credit risk with counterparties to derivative transactions, the company mitigates its exposure by allocating the risk among various counterparties and limiting exposure to any one party. We also monitor the credit ratings of our suppliers, customers, lenders and counterparties on a regular basis.

The U.S. note agreements, bank credit agreement and accounts receivable securitization agreement contain certain restrictions relating to dividends, investments, financial ratios, guarantees and the incurrence of additional indebtedness. The most restrictive of the company's debt covenants require the company to maintain a leverage ratio (as defined) of no greater than 4.00, prior to considering the impacts of the announced, proposed acquisition of Rexam. The company was in compliance with all loan agreements and debt covenants at March 31, 2016, and December 31, 2015, and has met all debt payment obligations. As of March 31, 2016, the amounts disclosed as available under the company's credit facilities, are available without violating our existing debt covenants. Additional details about our debt and receivables sales agreements are available in Note 11 accompanying the unaudited condensed consolidated financial statements within Item 1 of this report.

Short-term debt and current portion of long-term debt on the balance sheet includes the company's borrowings under its existing accounts receivable securitization agreement, which totaled \$115 million at March 31, 2016 and no amounts outstanding at December 31, 2015. This agreement, which has been amended and extended from time to time, is scheduled to mature in May 2017 and allows the company to borrow against a maximum amount of accounts receivable that varies between \$90 million and \$140 million depending on the seasonal accounts receivable balances in the company's North American packaging businesses.

#### **CONTINGENCIES, INDEMNIFICATIONS AND GUARANTEES**

Details about the company's contingencies, indemnifications and guarantees are available in Notes 17 and 18 accompanying the unaudited condensed consolidated financial statements included within Item 1 of this report. While management believes the company has established adequate accruals for expected future liability with respect to pending lawsuits, claims and proceedings, where the nature and extent of any such liability can be reasonably estimated based upon then presently available information, there can be no assurance that the final resolution of any existing or future lawsuits, claims or proceedings will not have a material adverse effect on the liquidity, results of operations or financial condition of the company.

#### **Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

In the ordinary course of business, the company employs established risk management policies and procedures, which seek to reduce our exposure to fluctuations in commodity prices, interest rates, exchange currencies and prices of the company's common stock in regard to common share repurchases and the company's deferred compensation stock plan, although there can be no assurance that these policies and procedures will be successful. The company mitigates its exposure by spreading the risk among various counterparties, thus limiting exposure with any one party. The company also monitors the credit ratings of its suppliers, customers, lenders and counterparties on a regular basis. Further details are available in Item 7A within Ball's 2015 annual report filed on February 16, 2016, and in Note 16 accompanying the unaudited condensed consolidated financial statements included within Item 1 of this report.

The company entered into derivative financial instruments to reduce its exposure to currency exchange rate risks in connection with the British pound denominated cash portion of the announced, proposed acquisition of Rexam. Considering the company's derivative financial instruments outstanding at March 31, 2016, a 10 percent decrease in value of the British pound against the U.S. dollar and the euro would have resulted in an unrealized pre-tax loss of approximately \$116 million and a 10 percent strengthening of the British pound compared to the U.S. dollar and the euro would have resulted in an unrealized pre-tax gain of approximately \$162 million. Exposure to currency exchange effects associated with these derivatives will be offset by changes in the ultimate purchase price of Rexam. Actual changes in market prices or rates may differ from hypothetical changes.

In addition, the company entered into derivative financial instruments to minimize its exposure to interest rate changes associated with anticipated debt issuances in connection with the announced, proposed acquisition of Rexam. Considering the company's derivative financial instruments outstanding at March 31, 2016, a 100-basis point increase or decrease in interest rates could result in an estimated \$78 million reduction, in net earnings over a one-year period. Actual results may vary based on actual changes in the market prices and rates and the timing of these changes.

---

[Table of Contents](#)

#### **Item 4. CONTROLS AND PROCEDURES**

Our chief executive officer and chief financial officer participated in management's evaluation of our disclosure controls and procedures, as defined by the Securities and Exchange Commission (SEC), as of the end of the period covered by this report and concluded that our controls and procedures were effective. There were no material changes

to internal controls during the company's first three months of 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

## FORWARD-LOOKING STATEMENTS

The company has made or implied certain forward-looking statements in this report which are made as of the end of the time frame covered by this report. These forward-looking statements represent the company's goals, and results could vary materially from those expressed or implied. From time to time we also provide oral or written forward-looking statements in other materials we release to the public. As time passes, the relevance and accuracy of forward-looking statements may change. Some factors that could cause the company's actual results or outcomes to differ materially from those discussed in the forward-looking statements include, but are not limited to: a) our packaging segments include product demand fluctuations; availability/cost of raw materials; competitive packaging, pricing and substitution; changes in climate and weather; crop yields; competitive activity; failure to achieve productivity improvements or cost reductions; mandatory deposit or other restrictive packaging laws; customer and supplier consolidation, power and supply chain influence; changes in major customer or supplier contracts or loss of a major customer or supplier; political instability and sanctions; and changes in foreign exchange or tax rates; b) our aerospace segment includes funding, authorization, availability and returns of government and commercial contracts; and delays, extensions and technical uncertainties affecting segment contracts; c) the company as a whole includes those listed plus: changes in senior management; successful or unsuccessful acquisitions and divestitures; regulatory action or issues including tax, environmental, health and workplace safety, including U.S. FDA and other actions or public concerns affecting products filled in our containers, or chemicals or substances used in raw materials or in the manufacturing process; technological developments and innovations; litigation; strikes; labor cost changes; rates of return on assets of the company's defined benefit retirement plans; pension changes; uncertainties surrounding the U.S. government budget, sequestration and debt limit; reduced cash flow; ability to achieve cost-out initiatives and interest rates affecting our debt; and successful or unsuccessful acquisitions and divestitures, including, with respect to the proposed Rexam PLC (Rexam) acquisition, the effect of the announcement of the acquisition on Ball's business relationships, operating results and business generally; the occurrence of any event or other circumstances that could give rise to the termination of our definitive agreement with Rexam in respect of the acquisition; the outcome of any legal proceedings that may be instituted against Ball related to the definitive agreement with Rexam; and the failure to satisfy conditions to completion of the acquisition of Rexam, including the receipt of all required regulatory approvals. If the company is unable to achieve its goals, then the company's actual performance could vary materially from those goals expressed or implied in the forward-looking statements. The company currently does not intend to publicly update forward-looking statements except as it deems necessary in quarterly or annual earnings reports. You are advised, however, to consult any further disclosures we make on related subjects in our Forms 10-K, 10-Q and 8-K reports to the SEC.

## PART II. OTHER INFORMATION

### Item 1. Legal Proceedings

There were no events required to be reported under Item 1 for the quarter ended March 31, 2016, except as discussed in Note 17 to the unaudited condensed consolidated financial statements within Part I, Item 1 within this report.

#### Item 1A. Risk Factors

Risk factors affecting the company can be found within Item 1A of the company's annual report on Form 10-K (annual report).

### Item 2. Changes in Securities

The following table summarizes the company's repurchases of its common stock during the quarter ended March 31, 2016.

(\$ in millions)	Purchases of Securities			
	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (a)	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs (b)
January 1 to January 31, 2016	—	\$ —	—	11,956,155
February 1 to February 29, 2016	1,225,341	65.84	1,225,341	10,730,814
March 1 to March 31, 2016	249,672	67.51	249,672	10,481,142
Total	1,475,013	66.13	1,475,013	

(a) Includes open market purchases (on a trade-date basis), share repurchase agreements and/or shares retained by the company to settle employee withholding tax liabilities.

(b) The company has an ongoing repurchase program for which shares are authorized from time to time by Ball's board of directors.

### Item 3. Defaults Upon Senior Securities

There were no events required to be reported under Item 3 for the quarter ended March 31, 2016.

### Item 4. Mine Safety Disclosures

Not applicable.

### Item 5. Other Information

There were no events required to be reported under Item 5 for the quarter ended March 31, 2016.

### Item 6. Exhibits

31.1 Certification pursuant to Rule 13a-14(a) or Rule 15d-14(a) by John A. Hayes, Chairman, President and Chief Executive Officer of Ball Corporation.

**Certification**

I, John A. Hayes, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Ball Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting that are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**Certification of Chief Executive Officer  
Pursuant to 18 U.S.C. Section 1350  
and Rule 13a-14(b) or Rule 15d-14(b)**

My name is John A. Hayes and I am the Chairman, President and Chief Executive Officer of Ball Corporation (the “Company”).

I hereby certify pursuant to 18 U.S.C. Section 1350 as adopted by Section 906 of the Sarbanes—Oxley Act of 2002 that to the best of my knowledge and belief:

- (1) the Quarterly Report on Form 10-Q for the quarter ended March 31, 2016, filed with the U.S. Securities and Exchange Commission on April 29, 2016 (“Report”), fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934 as amended; and
- (2) the information contained in the Report fairly presents, in all material respects, the financial condition and results of the operations of Ball Corporation as of, and for, the periods presented in the Report.

/s/ John A. Hayes

John A. Hayes  
Chairman, President and Chief Executive Officer  
Ball Corporation

Date: April 29, 2016

This certification, which accompanies the Form 10-Q to which it relates, is not deemed filed with the Securities and Exchange Commission and is not to be incorporated by reference into any filing of the Company under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended (whether made before or after the date of the Form 10-K), irrespective of any general incorporation language contained in such filing.

A signed original of this written statement required by Section 906, or other document authenticating, acknowledging, or otherwise adopting the signature that appears in typed form within the electronic version of this written statement required by Section 906, has been provided to the Company and will be retained by the Company and furnished to the Securities and Exchange Commission or its staff upon request.

**Certification of Chief Financial Officer  
Pursuant to 18 U.S.C. Section 1350  
and Rule 13a-14(b) or Rule 15d-14(b)**

My name is Scott C. Morrison and I am the Senior Vice President and Chief Financial Officer of Ball Corporation (the “Company”).

I hereby certify pursuant to 18 U.S.C. Section 1350 as adopted by Section 906 of the Sarbanes—Oxley Act of 2002 that to the best of my knowledge and belief:

- (1) the Quarterly Report on Form 10-Q for the quarter ended March 31, 2016, filed with the U.S. Securities and Exchange Commission on April 29, 2016 (“Report”), fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934 as amended; and
- (2) the information contained in the Report fairly presents, in all material respects, the financial condition and results of the operations of Ball Corporation as of, and for, the periods presented in the Report.

Date: April 29, 2016

This certification, which accompanies the Form 10-Q to which it relates, is not deemed filed with the Securities and Exchange Commission and is not to be incorporated by reference into any filing of the Company under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended (whether made before or after the date of the Form 10-K), irrespective of any general incorporation language contained in such filing.

A signed original of this written statement required by Section 906, or other document authenticating, acknowledging, or otherwise adopting the signature that appears in typed form within the electronic version of this written statement required by Section 906, has been provided to the Company and will be retained by the Company and furnished to the Securities and Exchange Commission or its staff upon request.

**SAFE HARBOR STATEMENT UNDER THE PRIVATE SECURITIES  
LITIGATION REFORM ACT OF 1995**

In connection with the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 (the Reform Act), Ball is hereby filing cautionary statements identifying important factors that could cause Ball's actual results to differ materially from those projected in forward-looking statements of Ball. Forward-looking statements may be made in several different contexts; for example, in the quarterly and annual earnings news releases, the quarterly earnings conference calls hosted by the company, public presentations at investor and credit conferences, the company's Annual Report and in annual and periodic communications with investors. The Form 10-K may contain forward-looking statements. As time passes, the relevance and accuracy of forward-looking statements may change. You are advised to consult any further disclosures Ball makes on related subjects in our 10-K, 10-Q and 8-K reports to the Securities and Exchange Commission. The Reform Act defines forward-looking statements as statements that express or imply an expectation or belief and contain a projection, plan or assumption with regard to, among other things, future revenues, income, earnings per share, cash flow or capital structure. Such statements of future events or performance involve estimates, assumptions and uncertainties, and are qualified in their entirety by reference to, and are accompanied by, the following important factors that could cause Ball's actual results to differ materially from those contained in forward-looking statements made by or on behalf of Ball.

Some important factors that could cause Ball's actual results or outcomes to differ materially from those expressed or implied and discussed in forward-looking statements include, but are not limited to:

- Fluctuation in customer and consumer growth, demand and preferences, particularly during the months when the demand for metal beverage beer and soft drink cans is heaviest; customer and supplier consolidation, power and supply chain influence; loss of one or more major customers or suppliers or changes to contracts with one or more customers or suppliers; manufacturing overcapacity or under capacity; failure to achieve anticipated productivity improvements or cost reductions including those associated with capital expenditures; changes in climate and weather; fruit, vegetable and fishing yields; interest rates affecting our debt; labor strikes and work stoppages; antitrust, intellectual property, consumer and other litigation; level of maintenance and capital expenditures; capital availability; economic conditions; and acts of war, terrorism or catastrophic events.
- Competition in pricing and the possible decrease in, or loss of, sales resulting therefrom.
- The timing and extent of regulation or deregulation; competition in each line of business; product development and introductions; and technology changes.
- Ball's ability or inability to have available sufficient production capacity in a timely manner.
- Overcapacity in metal container industry production facilities and its impact on costs, pricing and financial results.
- Regulatory action or federal, state, local or foreign laws, including mandatory deposit or restrictive packaging legislation such as recycling laws.
- Regulatory action or laws including tax, environmental, health and workplace safety, including in respect of climate change, or chemicals or substances used in raw materials or in the manufacturing process, particularly publicity concerning Bisphenol-A, or BPA, a chemical used in the manufacture of epoxy coatings applied to many types of containers (including certain of those products produced by the company).
- Regulations and standards, including changes in generally accepted accounting principles or their interpretation.
- Loss contingencies related to income and other tax matters, including those arising from audits performed by national and local tax authorities.

- The availability and cost of raw materials, supplies, power and natural resources needed for the production of metal containers as well as aerospace products.
- Changes in senior management; increases and trends in various employee benefits and labor costs, including pension, medical and health care costs incurred in the countries in which Ball has operations; rates of return projected and earned on assets and discount rates used to measure future obligations and expenses of the company's defined retirement plans; and changes in the company's pension plans.
- The ability or inability to pass on to customers changes in raw material cost, particularly steel and aluminum.
- The ongoing European recession, and its effects on liquidity, credit risk, asset values and the economy; international business and market risks (including foreign exchange rates or tax rates); political and economic instability in various markets, including periodic sell-offs on global equity markets; restrictive trade practices of national governments; the imposition of duties, taxes or other government charges by national governments; exchange controls; ongoing uncertainties surrounding sovereign debt of various European countries, as well as rating agency downgrades of various governments' debt; and ongoing uncertainties and other effects surrounding the U.S. government budget, funding, cutbacks and debt limit, as well as any potential government shutdowns or the impact of any threats of such shutdowns.
- Changes in foreign exchange rates of the currencies in the countries in which the company and its joint ventures carry on business.
- Undertaking successful and unsuccessful acquisitions, joint ventures and divestitures and the integration activities associated with acquisitions and joint ventures, including, with respect to the proposed Rexam PLC (Rexam) acquisition, the effect of the announcement of the acquisition on Ball's business relationships, operating results and business generally; the occurrence of any event or other circumstances that could give rise to the termination of our definitive agreement with Rexam in respect of the acquisition; the outcome of any legal proceedings that may be instituted against Ball related to the definitive agreement with Rexam; and the failure to satisfy conditions to completion of the acquisition of Rexam, including the receipt of all required regulatory approvals.
- The ability or inability to achieve technological and product extensions or new technological and product advances in the company's businesses.
- Delays, extensions and technical uncertainties, as well as schedules of performance associated with contracts for aerospace products and services, and the success or lack of success of satellite launches and the businesses and governments associated with aerospace products, services and launches.
- The authorization, funding and availability and returns of government contracts and the nature and continuation of those contracts and related services provided thereunder, as well as the delay, cancellation or termination of contracts for the United States government, other customers or other government contractors.

- Actual versus estimated business consolidation and investment exit costs and the estimated net realizable values of assets associated with such activities; and goodwill impairment.
- Changes to unaudited results due to statutory audits of our financial statements or management's evaluation of the company's internal controls over financial reporting.
